The clues to a series of remorseless killings go up in smoke—and only Kay Scarpetta can find them in this #1 New York Times bestseller from Patricia Cornwell. “Sears its way into the psyche...Ablaze with Cornwell’s finest, scariest writing.”—Atlanta Journal Constitution The devastating fire tore through the horse farm, destroying everything it touched. Picking through the wreckage, Dr. Kay Scarpetta uncovers human remains—the work of an audacious and

wily killer who uses fire to mask his brutal murders. And when Scarpetta learns that her old nemesis, Carrie Grethen, has escaped from a hospital for the criminally insane and is somehow involved, the investigation becomes personal. Tragedy strikes close to home. And Scarpetta must match Grethen's every move with one of her own to douse the inferno of evil that threatens everyone around her... Includes an Introduction by the Author

Earthwork projects are critical components in civil construction and often require detailed management techniques and unique solution methods to address failures. Being earth bound, earthwork is influenced by geomaterial properties at the onset of a project. Hence, an understanding of the in-situ soil properties is essential. Slope stability is a common problem facing earthwork construction, such as excavations and shored structures. Analytical methods for slope stability remain critical for researchers due to the mechanical complexity of the system. Striving for better earthwork project managements, the geotechnical engineering community continues to find improved testing techniques for determining sensitive properties of soil and rock, including stress-wave based, non-destructive testing methods. To minimize failure during earthwork construction, past case studies and data may reveal useful lessons and information to improve project management and minimize economic losses. This volume is part of the proceedings of the 1st GeoMEast International Congress and Exhibition on Sustainable Civil Infrastructures, Egypt 2017.

Kafka on the Shore displays one of the world's great storytellers at the peak of his powers. Here we meet a teenage boy, Kafka Tamura, who is on the run, and Nakata, an aging simpleton who is drawn to Kafka for reasons that he cannot fathom. As their paths converge, acclaimed author Haruki Murakami enfolds readers in a world where cats talk, fish fall from the sky, and spirits slip out of their bodies to make love or commit murder, in what is a truly remarkable journey.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.
