researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies. .

IELTS TECH - Speaking Essentials is the fifth and the last book in the IELTS-Tech Series and will effectively serve the purpose of both the Academic and General Candidate, particularly those appearing for the Interview Sessions to learn the technique of facing Interviews and Interacting with the Interviewee in the IELTS (The International English Language Testing System Examinations). It covers all the three vital aspects of Speaking Essentials as laid down in the IELTS Exams, i.e., Part- 1 Personal Interaction, Part - 2 Q - Cards and Part -3 Follow up Session.

This book is a collection of best selected papers presented at the International Conference on Inventive Computation and Information Technologies (ICICIT 2020), organized during 24-25 September 2020. The book includes papers in the research area of information sciences and communication engineering. The book presents novel and innovative research results in theory, methodology and applications of communication engineering and information technologies.

In Mrs. Osmond, John Banville continues the story of Isabel Archer, the young protagonist of Henry James's beloved *The Portrait of a Lady*. Eager but naïve, in James's novel Isabel comes into a large, unforeseen inheritance and marries the charming, penniless,

and--as Isabel finds out too late--cruel and deceitful Gilbert Osmond. Here Banville imagines Isabel's second chapter telling the story of a woman reawakened by grief and the knowledge that she has been grievously wronged, and determined to resume her quest for freedom and independence. A masterly novel of betrayal, corruption, and moral ambiguity, Mrs. Osmond would have thrilled James himself.

On the 20th September 1992, a group of bush walkers discovered a decaying corpse whilst orienteering in the Belanglo State Forest. The Discovery triggered the biggest manhunt in Australian History. Written by an actual lawyer who dealt with Ivan Milat in his early years, "Innocent Until Proven" is based on the true story behind serial killer Ivan Milat and his lawyers. It provides a real insight into the legal profession through the eyes of two young lawyers. "Innocent Until Proven" will make you laugh and make you cry. The climax is so gripping it will have you at the edge of your seat!

Since ancient times, plants have been used as a prime natural source of alternative medicines and have played an important role in our lives. The old tradition of medicinal plant application has turned into a highly profitable business in the global market, resulting in the release of a large number of herbal products. People have tried to find different sources of medicines to alleviate pain and cure different illnesses. Due to severe constraints of synthetic drugs and the

increasing contraindications of their usage, there is a growing interest world over in the usage of natural products based on medicinal herbs, hence, there is an ever expanding market of herbs and herbal based medicinal preparations all over the world. This has culminated into an exponential increase in number of research groups in different geographical locations and generation of volume of research data in the field in a short span of time. The path breaking advancement in research methods and interdisciplinary approaches is giving birth to newer perspectives. Therefore, it becomes imperative to keep pace with the advancement in research and development in the field of medicinal herbs. There are a large number of researchers in different parts of the world working on various aspects of medicinal plants and 'herbal medicines'. The idea is to bring their recent research work into light in the form of a book. The proposed book contains chapters by the eminent researchers in different countries and working with different disciplines of medicinal plants. Articles pertain to different disciplines such as: 1. Resources and conservation of medicinal plants 2. Biosynthesis and metabolic engineering of medicinal plants 3. Tissue culture, propagation and bioreactor technology of medicinal plants 4. Phytochemical research on medicinal plants 5. Herbal medicines and plant-derived agents in cancer prevention and therapy 6. Herbal medicines and plant-derived agents in metabolic syndrome management 7. Herbal medicines and plant-derived agents in modulation of immune-related disorders 8. Herbal medicines and hepatotoxicity The book will prove itself an asset for the researchers, professionals and also students in the area of medicinal plants and mechanism of their action.

This book offers a detailed overview of translational bioinformatics together with real-case applications. Translational bioinformatics integrates the areas of basic bioinformatics, clinical informatics, statistical genetics and informatics in order to further our understanding of the molecular basis of diseases. By analyzing voluminous amounts of molecular and clinical data, it also provides clinical information, which can then be applied. Filling the gap between clinic research and informatics, the book is a valuable resource for human geneticists, clinicians, health educators and policy makers, as well as graduate students majoring in biology, biostatistics, and bioinformatics.
