Berkshire Hathaway, the \$300 billion conglomerate that Warren Buffett built, is among the world’s largest and most famous corporations. Yet, for all its power and celebrity, few people understand Berkshire, and many assume it cannot survive without Buffett. This book proves that assumption wrong. In a comprehensive portrait of the distinct corporate culture that unites and sustains Berkshire’s fifty direct subsidiaries, Lawrence A. Cunningham unearths the traits that assure the conglomerate’s perpetual prosperity. Riveting stories recount each subsidiary’s origins, triumphs, and journey to Berkshire and reveal the strategies managers use to generate economic value from intangible values, such as thrift, integrity, entrepreneurship, autonomy, and a sense of permanence. Rich with lessons for those wishing to profit from the Berkshire model, this engaging book is a valuable read for entrepreneurs, business owners, managers, and investors, and it makes an important resource for scholars of corporate stewardship. General readers will enjoy learning how an iconoclastic businessman transformed a struggling shirt company into a corporate fortress destined to be his lasting legacy.

From the "guru to Wall Street's gurus" comes the fundamental techniques of value investing and their applications Bruce Greenwald is one of the leading authorities on value investing. Some of the savviest people on Wall Street have taken his Columbia Business School executive education course on the subject. Now this dynamic and popular teacher, with some colleagues, reveals the fundamental principles of value investing, the one investment technique that has proven itself consistently over time. After covering general techniques of value investing, the book proceeds to illustrate their applications through profiles of Warren Buffett, Michael Price, Mario Gabellio, and other successful value investors. A number of case studies highlight the techniques in practice. Bruce C. N. Greenwald (New York, NY) is the Robert Heilbrunn Professor of Finance and Asset Management at Columbia University. Judd Kahn, PhD (New York, NY), is a member of Morningside Value Investors. Paul D. Sonkin (New York, NY) is the investment manager of the Hummingbird Value Fund. Michael van Biema (New York, NY) is an Assistant Professor at the Graduate School of Business, Columbia University.

Revealed! The secret behind Warren Buffett’s 20% return rate over 60 YEARS The Warren Buffett Philosophy of Investment reveals—for the first time—how the world’s #1 investor combines his trademark value investing with a unique approach to mergers and acquisitions. The huge interest in Warren Buffett stems from the challenge to understand his history of earning more than 20% on capital annually during the last 60 years. Modern financial theory does not allow for this degree of success, nor has anyone else been able to replicate it. The book argues that Buffett's secret can be explained only if one looks beyond the theory of investing. The author sees the major drivers of his success as the transformation of Mr. Buffett's name into a super-brand of mergers and acquisitions, as well as his hands-off policy with respect to the acquired companies. As a result, Buffett enjoys numerous opportunities to buy first-class companies at moderate prices and keeps the existing good managers responsible for further value creation. Elena Chirkova is a professor of finance in the Higher School for Economics in Moscow and was previously Head of Corporate finance for Deloitte’s office in Russia.

"Trading is notoriously tough. But Altucher's new book adds anoteworthy addition to the library on Warren Buffett. He shows alot of Buffett that isn't readily available in the existing commonliterature. Definitely required reading for any serious Buffettbuff." –Kenneth L. Fisher, Forbes' "Portfolio Strategy"

Columnist Founder and CEO, Fisher Investments "Finally, someone blows apart the myth that Warren Buffett is a buy-and-hold investor. Altucher has given us an insightful and well-written commentary on how Buffett has amassed his track record, and what we can do to emulate him. He details the trade-by-trade examples. This is a must read for anyone wanting to learn about how the Master Investor works." -John Mauldin, author, Bull's Eye Investing editor of Thoughts from the Frontline (www.2000wave.com) While Warren Buffett is considered the "world's greatest value investor," there's another side to Buffett that is rarely talked about. Although Buffett has gained recognition for his value investing approach to the markets, the fact is that nobody over the past fifty years has traded and invested with a more diverse group of strategies than Buffett. Trade Like Warren Buffett challenges the current coverage of this great investor by including details of all of Buffett's investing and trading methods, including mean reversion, commodities, bonds, arbitrage, market timing, funds, as well as Graham-Dodd. To augment the discussion of each strategy, Trade Like Warren Buffett also includes interviews with leading financial professionals, who reveal in detail how they've successfully used the same techniques. There is no one way to sum up Warren Buffett's investment style. But if you're interested in boosting the performance of your portfolio, Trade Like Warren Buffett can show you how.

Expert advice for those who want to create a solid company Through hard work and determination Barnett Helzberg built his small family owned business—Helzberg Diamonds—into a successful company that caught the attention of Warren Buffett. Buffett was so impressed with the business that in 1995 he decided to purchase Helzberg Diamonds through his holding company Berkshire Hathaway. Helzberg shares his thirty years of experience in running a successful business and outlines the steps needed to prosper within a challenging business environment. Through "helpful hints" and words of wisdom, Helzberg offers a proven road map for entrepreneurs and business owners looking to build a solid company that will stand the test of time. What I Learned Before I Sold to Warren Buffett is a comprehensive guide that will help readers get their businesses on the right track. Barnett C. Helzberg Jr. (Kansas City, MO) was President of Helzberg Diamonds, Inc. from 1962 to 1995, a period during which he expanded his family-owned business to 143 stores in twenty-three states. His business practices have been a key ingredient to the success of Helzberg Diamonds.

Warren Buffett built Berkshire Hathaway into something remarkable—and Fortune journalist Carol Loomis had a front-row seat for it all. When Carol Loomis first mentioned a little-known Omaha hedge fund manager in a 1966 Fortune article, she didn't dream that Warren Buffett would one day be considered the world's greatest investor—nor that she and Buffett would quickly become close personal friends. As Buffett's fortune and reputation grew over time, Loomis used her unique insight into Buffett's thinking to chronicle his work for Fortune, writing and proposing scores of stories that tracked his many accomplishments—and also his occasional mistakes. Now Loomis has collected and updated the best Buffett articles Fortune published between 1966 and 2012, including thirteen cover stories and a dozen pieces authored by Buffett himself. Loomis has provided commentary about each major article that supplies context and her own informed point of view. Readers will gain fresh insights into Buffett's investment strategies and his thinking on management, philanthropy, public policy, and even parenting. Some of the highlights include: The 1966 A. W. Jones story in which Fortune first mentioned Buffett. The first piece Buffett wrote for the magazine, 1977's "How Inflation Swindles the Equity Investor." Andrew Tobias's 1983 article "Letters from Chairman Buffett," the first review of his Berkshire Hathaway shareholder letters. Buffett's stunningly prescient 2003 piece about derivatives, "Avoiding a Mega-Catastrophe." His unconventional thoughts on inheritance and philanthropy, including his intention to leave his kids "enough money so they would feel they could do anything, but not so much that they could do nothing." Bill Gates's 1996 article describing his early impressions of Buffett as they struck up their close friendship. Scores of Buffett books have been written, but none can claim this work's combination of trust between two friends, the writer's deep understanding of Buffett's world, and a very long-term perspective.

In this crisply written, thoroughly accessible book, educator Aaron Braxton provides parents and educators with insights and strategies for nurturing and encouraging successful students. Common sense prevails as Mr. Braxton discusses proper study habits. Get comfortable but not too comfortable (stay off that bed or you'll fall asleep before you'll retain information); get organized and have the discipline to turn off all distractions. Here parents will learn how to become aware to those teachable moments in which daily occurrences provide segues to meaningful discussions with children. He suggests ways in which to imaginatively enliven a child's learning process, and explains the full commitment required to raise a well-balance child. The goal is to give parents principles that will aid in their lives, thus aiding in the lives of their children. Mr. Braxton writes in a strong, easily understandable voice as he presents valuable concepts that empower and involve parents in their children's emotional, psychological, spiritual, and educational lives.

*** Wall Street Journal bestseller *** Investing isn't a man's world anymore—and this provocative and enlightening book shows why that's a good thing for Wall Street, the global financial system, and your own personal portfolio. Warren Buffett and all of the women of the world have one thing in common: They are better investors than the average man. It's been proved by psychologists and scientists, and the market calamities of the past two years have only provided more statistical and anecdotal evidence of the same. Here are just a few characteristics of female investors that distinguish them from their male counterparts. • Women spend more time researching their investment choices than men do. This prevents them from chasing "hot" tips and trading on whims -- behavior that tends to weaken men's portfolios. • Men trade 45% more often than women do, and although men are more confident investors, they tend to be overconfident. By trading more often -- and without enough research -- men reduce their net returns. But by trading less often, women get better returns and also save on transaction costs and capital gains taxes. • A study by the University of California at Davis found that women's portfolios gained 1.4% more than men's portfolios did. What's more, single women did even better than single men, with 2.3% greater gains. • Women tend to look at more than just numbers when deciding whether to invest in a company. They invest in companies they feel good about ethically and personally. And companies with good products, good services, and ethics tend to have better long-term prospects -- and face fewer lawsuits. Women, with their capability for patience and good decision-making, epitomize the Foolish investment philosophy and the investment practices of the most successful investor in history: Warren Buffett. While men are brash, compulsive, and overly daring, women tend to be more studious, skeptical, and reasonable. This indispensable volume from the multimedia financial education company Motley Fool offers essential advice for every investor hoping to turn today's savings into wealth for a better tomorrow.

There are many ways to make money in today's market, but the one strategy that has truly proven itself over the years is value investing. Now, with The Little Book of Value Investing, Christopher Browne shows you how to use this wealth-building strategy to successfully buy bargain stocks around the world.
