This book examines India-China relations throughout history as well as in the context of current business cooperation and competition. It also explores geo-political and societal factors, such as religion or class models, that influence and shape bilateral relations, and provides thorough analyses and comparisons of networks between the two countries. This book will appeal to researchers and graduate students interested in India-China relations as well as Chinese and Indian business ties.

This series spans the globe presenting leading research in economics. It is perhaps a sign of the times that economic weapons such as sanctions seem to be as powerful as or more so than tanks. International applications and examples of economic progress are invaluable in a troubled world with economic booms bursting like so many penny balloons. Globalisation, outstanding and jobless recoveries present economic issues of concern to millions.

In recent years the tremendous growth of the service sector—including international trade in services—has outstripped that of manufacturing in many industrialized nations. As the importance of services has grown, economists have begun to focus on policy issues raised by them and have tried to understand what, if any, differences there are between production and delivery of goods and services. This volume is the first book-length attempt to analyze trade in services in the Asia-Pacific region. Contributors provide overviews of basic issues involved in studying the service sector; investigate the impact of increasing trade in services on the economies of Taiwan, Korea, and Hong Kong; present detailed analyses of specific service sectors (telecommunications, financial services, international tourism, and accounting); and extend our understanding of trade in services beyond the usual concept (measured in balance of payment statistics) to include indirect services and services undertaken abroad by subsidiaries and affiliates.

Now nearing its sixtieth printing in English and translated into nineteen languages, Michael E. Porter's *Competitive Strategy* has transformed the theory, practice, and teaching of business strategy throughout the world. Electrifying in its simplicity—like all great breakthroughs—Porter's analysis of industries captures the complexity of industry competition in five underlying forces. Porter introduces one of the most powerful competitive tools yet developed: his three generic strategies—lowest cost, differentiation, and focus—which bring structure to the task of strategic positioning. He shows how competitive advantage can be defined in terms of relative cost and relative prices, thus linking it directly to profitability, and presents a whole new perspective on how profit is created and divided. In the almost two decades since publication, Porter's framework for predicting competitor behavior has transformed the way in which companies look at their rivals and has given rise to the new discipline of competitor assessment. More than a million managers in both large and small companies, investment analysts, consultants, students, and scholars throughout the world have internalized Porter's ideas and applied them to assess industries, understand competitors, and choose competitive positions. The ideas in the book address the underlying fundamentals of competition in a way that is independent of the specifics of the ways companies go about competing. *Competitive Strategy* has filled a void in management thinking. It provides an enduring foundation and grounding point on which all subsequent work can be built. By bringing a disciplined structure to the question of how firms achieve superior profitability, Porter's rich frameworks and deep insights comprise a sophisticated view of competition unsurpassed in the last quarter-century.

Analysing political corruption as a distinct but separate entity from bureaucratic corruption, this timely book separates these two very different social phenomena in a way that is often overlooked in contemporary studies. Chapters argue that political corruption includes two basic, critical and related processes: extractive and power-preserving corruption.

This timely volume examines various economic, managerial, social and political aspects of globalization and its impact on local economies. State-of-the-art analytical models and original empirical research is used to understand four key and interrelated facets of globalization; ϕ To understand the prospects and the problems of international business and MNCs in the global economy. ϕ To analyze globalization as a process of change. ϕ To understand the new roles

of nation states in light of the above. ϕ To articulate the uneasy idea that globalization has resulted in serious imbalances in the global economy. The collection hosts a list of internationally eminent scholars who explain the implications of globalization for progress, crises and conflicts in South and Southeast Asia.
