In this, the second of Geoff Moore's classic three-part marketing series, Moore provides highly useful guidelines for moving products beyond early adopters and into the lucrative mainstream market. Updated for the HarperBusiness Essentials series with a new author's note. Once a product "crosses the chasm" it is faced with the "tornado," a make or break time period where mainstream customers determine whether the product takes off or falls flat. In Inside the Tornado, Moore details various marketing strategies that will teach marketers how reach these customers and how to take advantage of living inside the tornado in order to reap the benefits of mainstream adoption.

The possibilities are staggering: Had you invested \$10,000 in Cisco Systems in early 1990, your investment would not be worth \$1,285,000. Similarly, a \$10,000 investment made in Microsoft in 1986 would be valued at more than \$1,800,000 today. How do you get in on those deals -- especially if you're not a Silicon Valley insider? How do you buy the high-tech winners and avoid the losers? How do you find the Microsofts and Ciscos of tomorrow? The answers are here, in The Gorilla Game. All you have to do is learn

the rules. The Gorilla Gamey reveals the dynamics driving the market for high-tech stocks and outlines the forces that catapult a select number of companies to "gorilla" status -- dominating the markets they serve in the way that Microsoft dominates software operating systems and Cisco dominates hardware for data networks. Follow the rules of The Gorilla Gamey and you will learn how to identify and invest in the "gorilla candidates" early on -- while they are fighting for dominance in their markets and while their stock is still cheap. When the dust clears and one company clearly attains leadership in its product category, you'll reap the enormous returns that foresighted investors in high-tech companies deserve. The Gorilla Gamey is the latest from bestselling author Geoffrey A. Moore, one of the world's leading consultants in high-tech marketing strategy. Here you'll find the ground-

breaking ideas about technology markets that made his previous books bestsellers, combined with the work of Paul Johnson, a top Wall Street technology analyst, and Tom Kippola, a high-tech consultant and highly successful private investor.

Together they have discovered and played the gorilla game and now give their readers the real rules for winning in the world of high-tech investing. Step by step you'll learn how to spot a high-tech market that is about to undergo rapid growth and development; how to identify and spread investments across the potential gorillas within the market; and how to narrow your investments to the single, emerging leader -- the gorilla -- as the market matures.

Crossing the Chasm, Geoffrey A. Moore shows that in the Technology Adoption Life Cycle—which begins with innovators and moves to early adopters, early majority, late majority, and laggards—there is a vast chasm between the early adopters and the early majority. While early adopters are willing to sacrifice for the advantage of being first, the early majority waits until they know that the technology actually offers improvements in productivity. The challenge for innovators and marketers is to narrow this chasm and ultimately accelerate adoption across every segment. This third edition brings Moore's classic work up to date with dozens of new examples of successes and failures, new strategies for marketing in the digital world, and Moore's most current insights and findings. He also includes two new appendices, the first connecting the ideas in Crossing the

Here is the bestselling guide that created a new game plan for marketing in high-tech industries. Crossing the Chasm has become the bible for bringing cutting-edge products to progressively larger markets. This edition provides new insights into the realities of high-tech marketing, with special emphasis on the Internet. It's essential reading for anyone with a stake in the world's most exciting marketplace.

and create market-shattering tremors. Every company lives on it; no manager can control it. In the original edition of *Living on the Fault Line*, Geoffrey Moore presented a compelling argument for using shareholder value (or share price) as the key driver in management decisions. Moore now revisits his argument in the post-Internet bubble world, proving that the methods he espouses are more germane than ever and showing companies how to use them to survive and thrive in today's demanding economy. Extending the themes of *Crossing the Chasm* and *Inside the Tornado*, his first two books on the dynamics of the high-tech markets, Moore shows why sensitivity to stock price is the single most important lever for managing in the future, both as a leading indicator of shifts in competitive advantage and as an employee motivator for making necessary changes in

organizations heretofore impervious to change. This revised and updated edition includes: A deeper emphasis on core versus context, which has emerged as the key distinction in allocating resources to improve shareholder value A new Competitive Advantage Grid that will aid managers in achieving and sustaining competitive advantage, the most important component in managing for shareholder value An expanded Value Discipline Model as it relates to the Competitive Advantage Grid Analysis of the powerful new trend toward core/context analysis and outsourcing production duties Updated models of organizational change for each stage of market development As disruptive forces continue to buffet the marketplace and rattle the staid practices of the past, Moore offers a brilliant set of navigational tools to help meet today's most compelling management challenges.

Geoffrey Moore is one of the most respected and bestselling names in Silicon Valley's Cutting Edge business books. In his widely quoted *Crossing the Chasm*, he identified and addressed the greatest challenge facing new ventures. Now he's back with a book for established businesses that need to learn how to adapt—or suffer the slow declines into marginalized performance that have characterized so many Fortune 500 icons in recent years. Deregulation, globalization, and e-commerce are exerting unprecedented pressures on company profits. In this new economic ecosystem, companies must dramatically differentiate from their direct competitors—or risk declining performance and eventual extinction. But how do companies choose the right innovation strategy? Or overcome internal inertia that resists the kind of radical commitments

needed to truly set the company's offers apart? Illustrating his arguments with more than one hundred examples and a full-length case study based on his unprecedented access to Cisco Systems, Moore shows businesses how to meet today's Darwinian challenges, whether they're producing commodity products or customized services. For companies whose competitive differentiation to the marketplace is still effective, he demonstrates how innovations in execution can help boost productivity, whether a company is competing in a growth market, a mature market, or even a declining market. For companies in danger of succumbing to competitive pressures, he shows how to overcome inertia by engaging the entire corporate community in an unceasing commitment to innovate and evolve. For any business competing in today's eat-or-be-eaten economic jungle,
