ESSENTIAL PSYCHIATRY FOR THE AESTHETIC PRACTITIONER Aesthetic practice requires an understanding of human psychology, yet professionals across cosmetic medicine and related fields receive no formal training in identifying and managing psychological conditions. Essential Psychiatry for the Aesthetic Practitioner provides concise yet comprehensive guidance on approaching patient assessment, identifying common psychiatric diseases, and managing challenging situations in cosmetic practice. This much-needed guide brings together contributions by dermatologists, plastic surgeons, psychiatrists, psychologists, and other experts to help practitioners understand the role of psychology in cosmetic practice and improve interpersonal relations with their patients. Assuming no previous background knowledge in psychiatry, the text provides cosmetic practitioners of all training and experience levels with clear guidance, real-world advice, and effective psychological tools to assist their practice. Through common clinical scenarios, readers learn to determine if a patient is a good candidate for a cosmetic procedure, enhance the patient experience, deal with difficult personalities in the cosmetic clinic, recognize obsessive compulsive and body dysmorphic disorders, and more. Describes how to use psychologically informed approaches and treatments for aesthetic patients Features easy-to-use psychological tools such as motivational interviewing, progressive muscle relaxation, guided imagery, and acceptance and commitment therapy Includes extensive references and practical tips for understanding the psychological implications of cosmetic treatments Covers cosmetic consultations for female, male, and transgender patients Discusses the history and psychology of beauty as well as the role of cosmetics and cosmeceuticals Emphasizes the importance of screening for common psychological comorbidities Addresses the impact of social media on self-image and its role in a growing crisis in beauty and appearance Highlights the need to develop new guidelines to treat rapidly evolving patient populations Explores how gender fluidity and variations in ethnicity are changing the approaches to aesthetic patients Essential Psychiatry for the Aesthetic Practitioner is required reading for dermatologists, plastic surgeons, cosmetic doctors, dentists, nurses, and physician assistants and all other professionals working in aesthetic medicine.

The papers in this volume were presented at TMRA 2007, the International Conference on Topic Maps Research and Applications, held October 11–12, 2007, in Leipzig, Germany. TMRA 2007 was the third conference in an annual series of international conferences dedicated to Topic Maps in science and industry. The motto of TMRA 2007 was “Scaling Topic Maps.” Taken literally the motto implies developing Topic Maps approaches that scale to large data and user volumes. This is a very real and useful research problem which is addressed by many of the contributions to the conference. But there is an even broader interpretation of the motto: wide adoption of Topic Maps in academia and industry. This is an equally important problem, and one that the TMRA conference series exists to help solve. And there is a more fanciful view on the motto. To “scale” can also mean to climb, so for the attendees the conference provided a way to “scale the mountain of Topic Maps.” In all these ways TMRA 2007 helped to scale Topic Maps.
