Students who have used Smith/Minton's Calculus say it was easier to read than any other math book they've used. Smith/Minton wrote the book for the students who will use it, in a language that they understand, and with the expectation that their backgrounds may have some gaps. Smith/Minton provide exceptional, reality-based applications that appeal to students' interests and demonstrate the elegance of math in the world around us. New features include:

- Many new exercises and examples (for a total of 7,000 exercises

and 1000 examples throughout the book) provide a careful balance of routine, intermediate and challenging exercises. • New exploratory exercises in every section that challenge students to make connections to previous introduced material. • New commentaries ("Beyond Formulas") that encourage students to think mathematically beyond the procedures they learn. • New counterpoints to the historical notes, "Today in Mathematics," stress the contemporary dynamism of mathematical research and applications, connecting past contributions to the present. • An enhanced discussion of differential equations and additional applications of vector calculus. • Exceptional Media Resources: Within MathZone, instructors and students have access to a series of unique Conceptual Videos that help students understand key Calculus concepts proven to be most difficult to comprehend, 248
