profit society with an elected, volunteer executive.

Ecology and Wonder celebrates Western Canada's breathtaking landscape. The book makes several remarkable claims. The greatest cultural achievement in the mountain region of western Canada may be what has been preserved, not what has been developed. Protecting the spine of the Rocky Mountains will preserve crucial ecological functions. Because the process of ecosystem diminshment and species loss has been slowed, an ecological thermostat has been kept alive. This may well be an important defence against future impacts of climate change in the Canadian West.

Mountains have long held an appeal for people around the world. This book focusses on the diversity of perspectives, interaction and role of tourism within these areas. Providing a vital update to the current literature, it considers the interdisciplinary context of communities, the creation of mountain tourism experiences and the impacts tourism has on these environments. Including authors from Europe, Asia-Pacific and North America, the development, planning and governance issues are also covered.

Chic Scott covers all aspects of the sport, ranging from the ski jumpers at Rossland in the 1890s to the birth of ski lodges and ski resorts to the heliskiers, loppet racers and snowboarders of today.

Short-listed for the 2010 Banff Mountain Book Festival Competition *The Mountain Knows No Expert* epitomizes George Evanoff's philosophy towards the outdoors, while presenting an intriguing contrast with the man himself. Widely regarded as an "expert," he was a knowledgeable, experienced, and practical outdoorsman, teacher, and mentor, yet ironically lost his life in the mountains in an encounter with a grizzly. Son of a Macedonian immigrant family, George was raised in Alberta, and went on to become a mountaineer, guide, avalanche specialist, and pioneer in ecotourism in British Columbia's North Rockies. The many themes embedded in Evanoff's life experiences encompass self-propelled backcountry travel, outdoor safety, avalanche safety and rescue, ski patrol leader, exploration and discovery, outdoor ethics, and public involvement with respect to land and resource use. George Evanoff was honoured in several tangible ways after his death, culminating in the naming of Evanoff Provincial Park in the Hart Ranges of the Rockies.

Joint publication of the two associations. Topics include professionalism, mountain sense, client care, terrain assessment, risk management, technical systems, application for guides, instructional techniques.

Dispelling the myth that people in the Global North share similar experiences of climate change, this book reveals how intersecting social dimensions of climate change—people, processes, and institutions—give rise to different experiences of loss, adaptation, and resilience among those living in rural and resource contexts of the Global North. Bringing together leading feminist researchers and practitioners from three countries—Australia, Canada, and Spain—this collection documents gender relations in fossil fuel, mining, and

# Download Ebook Canadian Mountain Guide Certification

extractive industries, in land-based livelihoods, in approaches for inclusive environmental policy, and in the lived experience of climate hazards. Uniquely, the book brings together the voices, expertise, and experiences of both academic researchers and women whose views have not been prioritized in formal policies—for example, women in agriculture, Indigenous women, immigrant women, and women in male-dominated professions. Their contributions are insightful and compelling, highlighting the significance of gaining diverse perspectives for a fuller understanding of climate change impacts, more equitable processes and strategies for climate change adaptation, and a more welcoming climate future. This book will be vital reading for students and scholars of gender studies, environmental studies, environmental sociology, geography, and sustainability science. It will provide important insights for planners, decision makers, and community advocates to strengthen their understanding of social dimensions of climate change and to develop more inclusive and equitable adaptation policies, plans, and practices.

Skiers and snowboarders, prepare to realize your wildest dreams as we take you to the best peaks on the planet. Peter Oliver has explored mountains across the earth, skiing hundreds of thousands of vertical feet through untold stashes of powder in his quest for the best. Along the way, he's seen skiing and boarding merge in a mutual longing to put the adventure back into alpine skiing. That means off-trail (or "off-piste") runs, glade skiing, plenty of lift-served backcountry, out-of-bounds opportunities, and more and better heli-skiing. It means new resorts and newly opened terrain at classic resorts that make snowboarding and skiing more exciting than ever.

From skilled weekend warriors to internationally recognized stars of the professional adventure game, Lynn Martel has interviewed dozens of the most dynamic, creative and accomplished self-propelled adventurers of our time. In *Expedition to the Edge: Stories of Worldwide Adventure*, Martel has assembled 59 compelling and entertaining stories that uniquely capture the exploits, the hardships, the fears and the personal insights of a virtual who's who of contemporary adventurers as they explore remote mountain landscapes from the Rockies to Pakistan to Antarctica. Through candid and revealing conversations, Martel captures the joys, the motivations and the revelations of top climbers Sonnie Trotter, Sean Isaac, Raphael Slawinski and Steph Davis; Himalayan alpinists Carlos Buhler, Marko Prezelj and Barry Blanchard; record-setting paraglider Will Gadd; Everest skier Kit Deslauriers; the conservationist duo Karsten Heuer and Leanne Allison as they follow a caribou herd for five months on foot across the Yukon; and Colin Angus on his two-year quest to become the first person to circumnavigate the world by human power.
