Ecology and Wonder celebrates Western Canada's breathtaking landscape. The book makes several remarkable claims. The greatest cultural achievement in the mountain region of western Canada may be what has been preserved, not what has been developed. Protecting the spine of the Rocky Mountains will preserve crucial ecological functions. Because the process of ecosystem diminshment and species loss has been slowed, an ecological thermostat has been kept alive. This may well be an important defence against future impacts of climate change in the Canadian West.

Mountains have long held an appeal for people around the world. This book focusses on the diversity of perspectives, interaction and role of tourism within these areas. Providing a vital update to the current literature, it considers the interdisciplinary context of communities, the creation of mountain tourism experiences and the impacts tourism has on these environments. Including authors from Europe, Asia-Pacific and North America, the development, planning and governance issues are also covered.

Take the snowiest mountains in Canada, add two Austrian immigrants, an army of adrenaline-addicted skiers (kings, queens, billionaires, average people and everyday ski bums) and throw a helicopter into the mix for an unforgettable story of mountain adventure. The tale begins when two childhood friends-Hans Gmoser and Leo Grillmair-leave postwar Austria and travel to Canada in search of adventure. They stumble upon employment taking skiers across the vast glaciers and through the thick forests of Western Canada. When skiers start asking the immigrant mountaineers if it would be possible to use a helicopter to reach the best high-altitude powder, the two find themselves catapulted into a project brimming with more adventure, success, tragedy and fame than they could have dreamed. Complete with archival and contemporary photos, this is the inside story of the people, thrills, accidents and innovations behind the evolution of a sport from a dangerous, ramshackle and lawless enterprise into a multi-million dollar industry offering reliable access to one of the world's most exciting forms of recreation.

Calgary Goes Skiing tells the story of the Calgary Ski Club. From its origins in 1920 with Scandinavian ski jumpers in Elbow Park to the family racing club of the 1960s to today's adult recreation club, it's all here. This is the colourful story of the city's ski pioneers who helped establish the sport in Calgary and Banff National Park.
