When Sara Olsher was diagnosed with cancer at the age of 34, her first thought was how to tell her six-year-old daughter without scaring her. Cancer Party! is the result of that conversation and experience. It is the book Sara wished she could have smuggled up on the couch and read with her child. Cancer Party! is a little bit science, a little bit silly, and a lot straightforward. Keeping it simple, Cancer Party! uses bright illustrations to show how cells divide, work, and what happens when a cell gets confused and turns into cancer. Aimed at families with kids ages 4 to 10, Cancer Party! helps families address the physical impact cancer treatment has on a patient and their child, helps kids understand what to expect, and assures them that cancer isn't their fault. "But every once in awhile, one of the cells forgets what its job is. It can't remember what to do! It's so confused. And since it doesn't know what else to do, it decides to have a PARTY." Cancer Party! is the perfect book for families that want to explain what cancer actually is, and applies to mothers, fathers, grandparents, and many types of cancer, including breast cancer, colon cancer, blood cancers such as leukemia, and bone cancers. It aims to empower kids with knowledge, which is proven to help kids through traumatic situations. Sara Olsher is the founder of Mighty + Bright, which helps families through hard things like divorce, cancer, and other major changes using visual magnetic calendars and daily charts. Based on decades of research about emotional intelligence and how to talk to kids so they actually learn, Mighty + Bright's calendars have helped hundreds of families through some of the hardest times in their lives.

This planner is designed for anyone who had dealt with Cancer. No matter if you've just gotten your diagnosis, or are in the throes of treatment, or if you've already reached your Cancer-free status, it's time to celebrate. To help you achieve your plan, you'll find step-by-step instructions in each chapter. It includes several ideas to spur on creativity along with encouraging quotes, scriptures, and affirmations to keep the planning process on track. It is perfect for completing during treatment times. All of this helps to renew your mind and transports you quickly into your Cancer-free transformation. So, let's get this party started and celebrate the Cancer-Free YOU with your one of a kind, designed by you, Cancer-Free Party!

The Whoozit Froozle Tea Party By: Jennifer Ott Even though they looked quite different, the Whoozits and Froozles lived happily together in Voovyville, and some were even the best of friends. One day, a problem arose, and life for the Whoozits and Froozles was about to change. This is the story of two children from different backgrounds, appearances, and families, who recognize that our differences are what make us important. Celebrating these differences is necessary in order to keep Voovyville together.

Elmer Kay, the Peanut Butter Kid, plans his Birthday Party with his parents, close friends and the family dog, Pappy. They all decide on what peanut butter refreshments should be served.Elmer surprises everyone when he tells them what he would like to do instead of having people give him presents.His mother, Mrs. Kay comes up with an idea. All of them find a way to make her plan work. Everybody feels very good about the party and all want to do the same thing for their celebrations.The author envisions this book not only as an enjoyable read but as a tool for discussions by teachers, parents, kids, adults and an instrument to raise moneys for all charitable and non-profit organizations. She wishes every party will become a "White Envelope Party" and that the joy of giving enhances everyone's special occasions.Suggested for ages 4 and up.

Few things affect a family's everyday life like the presence of an illness like cancer. Whether it's a grandparent, another family member, a teacher or neighbor or friend, children especially experience confusion, fear and misunderstanding. This book will help kids cope with the presence of cancer in their lives. Book includes 14 wonderful, full-color, full-page illustrations, and some 40 helpful pointers written expressly for children 4-12. A rare and excellent resource!

This activity book, written by the founder of The Children's Treehouse Foundation, is designed to help children cope with the news that their parents or grandparents have cancer. The diary provides age-appropriate explanations and allows kids to express their feelings through drawing, coloring, pasting, and writing.

With nearly two million new cases of cancer diagnosed every year in the U.S. alone, the number of children who must deal with the stress of a loved one's illness is steadily growing. Children need to share what they feel and ask what they want to know when someone in their family has cancer. The Rainbow Feelings of Cancer is a valuable resource in encouraging this conversation between children and parents, or other caregivers. Chia Martin was diagnosed with colon cancer in 1998, when her daughter Carrie was seven. As the years of her treatment continued, Chia found that Carrie's artwork provided an invaluable springboard to their talks about the young girl's feelings. Today, at age ten, Carrie shares what she has named "the rainbow feelings of cancer." This book contains her artwork and her words about the different emotions brought about by her mom's illness. She describes what has been hard for her, and what has helped her. Anyone who spends time with children whose parents or loved ones have a diagnosis of cancer, can benefit from this beautiful and heartwarming book. Ideal for parents and friends, caregivers, health professionals, hospice workers, teachers and school counselors. The Rainbow Feelings of Cancer does not tell children what they will or should feel. Rather, this book gently invites them into Carrie's world for a moment, allowing them to identify with her experience, offering them an opportunity to speak, draw, or consider their own feelings. While some books focus only on one type of cancer or deal with a particular loss, The Rainbow Feelings of Cancer is useful with any cancer diagnosis, any type of treatment, and at any stage of illness.

Tegneserie - graphic novel. Tyler Feder shares her story of her mother's first oncology appointment to facing reality as a motherless daughter

As a nurse I have been in situations where patients learned very bad news about the state of their health, news that was not received well by them, their families, or even their medical team. When preparing this book, my feelings were much the same as when I was in those situations. The bad news about the health of our nation is, like cancer in a patient's body, communism (also known as "Marxism") has grown in the United States. Like cancer, it started with an unnoticed seed and grew insidiously with little sign or symptom. Now like cancer, communism is on the brink of overwhelming us. Because I know that knowledge of their cancer is essential to my patient's first step towards survival, I believe that knowledge of our communism is essential to the United States of America's first step towards survival. So within this book, I describe: how I learned about the symptoms (The Real Communist Threat Witnessed); the disease (the Introduction and Sections 1, 2, 3 and 4 of the Communist Manifesto); the signs and symptoms (President Obama's Communist Agenda); and the treatment and cure (Constitution versus Communist Manifesto: The War within America). Extremist Socialists, also known as Communists, like Extremist/Radical Islamists believe their ends justify their means (that is: lying, cheating, stealing, and killing).
