A complete and updated commentary on the Code of Canon Law prepared by the leading canonists of North America and Europe. Contains the full, newly translated text of the Code itself as well as detailed commentaries by thirty-six scholars commissioned by the Canon Law Society of America.

Canons are central to our understanding of our culture, and yet in the last thirty years there has been much conflict and uncertainty created by the idea of the canon. In essence, the canon comprises the works and artists that are widely accepted to be the

greatest in their field. Yet such an apparently simple construct embodies a complicated web of values and mechanisms. Canons are also inherently elitist; however, Carys Wyn Jones here explores the emerging reflections of values, terms and mechanisms from the canons of Western literature and classical music in the reception of rock music. Jones examines the concept of the canon as theorized by scholars in the fields of literary criticism and musicology, before moving on to search for these canonical facets in the reception of rock music, as represented by ten albums: Bob Dylan's Highway 61 Revisited, The Beach Boys' Pet Sounds, The Beatles' Revolver, The Velvet Underground's The Velvet

Underground & Nico, Van Morrison's Astral Weeks, Marvin Gaye's What's Going On, The Rolling Stones' Exile on Main St., Patti Smith's Horses, The Sex Pistols' Never Mind the Bollocks: Here's the Sex Pistols, and Nirvana's Nevermind. Jones concludes that in the reception of rock music we are not only trying to organize the past but also mediate the present, and any canon of rock music must now negotiate a far more pluralized culture and possibly accept a greater degree of change than has been evident in the canons of literature and classical music in the last two centuries.

"Drawing upon new manuscript discoveries, the

author shows how Burchard tried to create a new text that would address these problems. He carefully selected and compiled canons from earlier collections and then went on to tamper systematically with the texts he had chosen. By doing so, he created a book of church law that appeared to be based on indisputable authority, that was internally consistent and that was easy to apply through logical extrapolation to new cases. The present study thus provides a window into the development of legal and theological reasoning in the medieval West, and suggests that, thanks to the work of ambitious bishops, the flowering of law and theology began far earlier, and for different reasons, than scholars have

'Canon Law' explores the canon law of the Roman Catholic Church from a comparative perspective. The introduction to the book presents historical examples of antinomian and legalistic approaches to canon law.

Lee Martin McDonald provides a magisterial overview of the development of the biblical canon --- the emergence of the list of individual texts that constitutes the Christian bible. In these two volumes -- in sum more than double the length of his previous works -- McDonald presents his most in-depth overview to date. McDonald shows students and

researchers how the list of texts that constitute 'the bible' was once far more fluid than it is today and guides readers through the minefield of different texts, different versions, and the different lists of texts considered 'canonical' that abounded in antiquity. Questions of the origin and transmission of texts are introduced as well as consideration of innovations in the presentation of texts, collections of documents, archaeological finds and Church councils. In the first volume McDonald reexamines issues of canon formation once considered settled, and sets the range of texts that make up the Hebrew Bible (or Old Testament) in their broader context. Each individual text is discussed, as are the cultural,

political and historical situations surrounding them. This second volume considers the New Testament, and the range of so-called 'apocryphal' gospels that were written in early centuries, and used by many Christian groups before the canon was closed. Also included are comprehensive appendices which show various canon lists for both Old and New Testaments and for the bible as a whole.

In four periods : From the foundation of the Church to the "Decretum Gratiani", from the Gregorian Reform to the Council of Trent, from Trent to the "Codex Iuris Canonici", and from its promulgation in 1917 to the new Codex of 1983, Van de Wiel offers a clear

description of the general concepts and constitutive sources of Canon Law. His work is a contribution to the history of canon law and will be of great service both to students and jurists. Constant Van de Wiel is currently professor of Canon Law at the Catholic University of Leuven, Louvain (Belgium), Chancellor and Keeper of the Archives of the Archdiocese of Mechlin-Brussels. He published on the subject in the Louvain Journal of Theological and Canonical Studies : "Ephemerides Theologicae Lovanienses", and in several specialized journals.

This book offers a fresh cross-disciplinary approach to the current discussion on the Christian canon

formation process. By carefully integrating historical, hermeneutical and theological aspects to account for the emergence of the canon, it seeks to offer a more comprehensive picture of the canon development than has previously been achieved. The formation and continuous usage of the Christian biblical canon is here viewed as an act of literary preservation and actualization of the church's apostolic normative tradition - 'the Scriptures and the Lord' - addressing, first of all, the church, but also the wider society. In order to grasp the complex phenomenon of the biblical canon, the study is divided into four parts, focusing respectively on linguistic and effective-historical, textual and material, performative, and

ideational aspects of the canon. Attention is given to the scribal nomina sacra convention, the codex format, oral and written Gospel, early Christian liturgical praxis and the Rule of Faith. Bokedal argues that the canon was formed in a process, with its own particular intention, history, and direction. Throughout the study, history and theology, past and present are considered alongside each other. By using a Gadamerian hermeneutics of tradition, the reader's attention is directed to historical dimensions of the canon and its interpretative possibilities for our time. The notion of effective history (*Wirkungsgeschichte*), as well as the interaction between text, community and reader are crucial to the argument. The canonical

text as text, its interpretation and ritual contextualization are highlighted as unifying elements for the communities being addressed.
