Cappuccetto Rosso in un'edizione speciale bilingue: la fiaba si può leggere sia in italiano che in inglese.

This volume collects original essays on Hungarian-German playwright and screenwriter George Tabori (1914-2007) and his remarkable contributions to the stage. Tabori, a Jewish refugee and a truly transnational author, was best known for his work in New York theater that irreverently explored the Jewish experience, particularly the Holocaust. Although his illustrious career spanned a

century, two continents, several languages, and a variety of literary genres, Tabori's work has received scant attention in American letters, in spite of its significance for U.S. theater and Holocaust studies. Until Tabori, most dramas about the Holocaust were either rooted in American domestic realism, striving to create a strong empathetic connection between the audience and Holocaust victims, or featured an unembellished documentary style. Tabori staked out a third position, beyond realism and documentation. The volume brings together the voices of international scholars to provide a

comprehensive introduction to Tabori's theater as well as in-depth analyses of his work, discussing all of his major plays. Individual essays address Tabori's postdramatic theater in relation to sacrificial ritual, performance studies, and post-humanist approaches to the contemporary stage, as well as performance aspects of his productions, questions of ethics and aesthetics raised by his theater, and his plays' relation to Holocaust representation in popular culture.

Sandra Beckett's book explores the contemporary retelling of the Red Riding Hood tale in Western children's literature.

The expression of time is fundamental in communication and languages have developed a variety of means to encode temporal relations. When learning a new language, learners are often faced with the challenging task of discovering a new system of temporal relations. The present study investigates the

development of tense and aspect marking in the interlanguage of L3 Italian learners enrolled in university language courses. It examines how the tense-aspect system develops in the interlanguage and how the acquisition process is shaped by factors such as the lexical aspectual value of the predicates and discourse grounding. The data indicate that both lexical aspect and discourse grounding influence the distribution of verbal morphology in the interlanguage. Semantically congruent pairings of lexical aspect, verbal morphology and discourse grounding are used more frequently and appropriately than less

prototypical combinations. The acquisition process is also influenced by the learner's L1, which was mostly German in the context of the present study. The study can be used as a guide for curricular decisions in language teaching, and for projecting further research on the development of tense-aspect marking in multilingual learners.

of patients with non-fluent aphasia. Recent research in languages other than English has challenged our old descriptions of aphasia syndromes: while their patterns can be recognized across languages, the structure of each language has a profound effect on the symptoms of aphasic speech. However, the basic linguistic concepts needed to understand these effects in languages other than English have rarely been part of the training of the clinician. "Non-fluent Aphasia in a Multilingual World" introduces these concepts plainly and concretely, in the context of dozens of examples from the

narratives and conversations of patients speaking most of the major languages of Europe, North America and Asia. Linguistic and clinical terms are carefully defined and kept as theory neutral as possible. "Non-Fluent Aphasia in a Multilingual World" is especially useful for speech-language pathologists whose patients are immigrants and guestworkers, and for the clinician who must deal creatively with the challenges of providing aphasia diagnosis and therapy in a multicultural, multidialectical setting.
