A case can be made
that the extensive use
of air conditioning use
in the United States is

Online Library Carrier Window

an excess and poor example to the rest of the world that makes a mockery of the current ideology of energy sustainability including concerns about prevention of global warming.

Extension of these wasteful practices to emerging economies (like India) is easily shown to be

Online Library Carrier Window

As unsustainable. As with other recalcitrant problems such as over-reliance on cars and poor personal health and dietary habits the source of the problem is found individual moral choices that are championed as individual freedoms but actually representing

degenerate morality
which yields more
benefit to corporations
and big government.
The Buddhist ethic
provides one path into
the heart of human
choices illuminating
as it does the
"incorrect thinking"
that underlies bad
choices including
those that most
people think are

new thinking on
personal energy use
that will go much
further to create true
sustainability than
programs based on
"harnessing"
geophysical
technologies such as
solar and wind.
