Since 1974, when the current wave of democratisation began, the movement towards democracy in Asia has remained limited. Many countries in Asia, in fact, are not making a decisive move towards democracy, and find themselves struggling with the challenges of democratic consolidation and governance. Focusing on Indonesia, Thailand and Korea, this book analyses why democratisation is so difficult in Asia. The book investigates the dynamics by which citizens embrace democratic rule and reject authoritarianism, and also compares these dynamics with those of consolidating democracies around the world. The book looks at the forces that affect the emergence and stability of democracy, such as elite interactions, economic development and popular attitudes as beliefs and perceptions about the legitimacy of political systems have long been recognised as some of the most critical influences on regime change. The book also discusses what it is about the nature of public opinion and the processes of day-to-day democratic participation that have made these countries vulnerable to repeated crises of legitimacy. Using Indonesia, Korea, and Thailand as case studies, this book highlights the uniqueness of the Asia ' s path to democracy, and shows both the challenges and opportunities in getting there. The book will be of interest to students and scholars of Asian Politics, Comparative Politics and International Studies.

The discovery of genuine Manichaeian texts from sites like Turfan and Tun-huang since the beginning of the century has greatly increased our knowledge of the teaching of Manichaeism and of its amazing geographical spread in pre-Islamic times. This volume brings together the contributions by a leading authority on the subject including a long survey article on the history of the discovery of the texts from Central Asia as well as articles focusing on some of these texts and on the incredible history of adaptation and survival of the sect in China proper. The studies include many Chinese texts on Manichaeism made available for the first time in their original scripts and in translation. The volume also contains the first ever working catalogue of all Manichaeian texts (in western as well as oriental languages) published up to 1997.

Eurasian history writing has invariably focused on the civilizations of China, India, Persia, Arabia and Europe. Geographically these regions encircle the wide area of Central Asia, which appears as a sort of black hole in the middle of the world, the home of migrants, monks and mullahs and above all of barbarians. However, the outlying civilizations were formed and even defined through interaction with Central Asia. Therefore, the intent of this study is to demand due recognition of the centrally important role of Central Asians in the history of their neighbours and thus their place in world system history as a whole.

This book considers the applicability and use of civil society, both as a concept and in practice, in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan. The volume examines whether civil society organisations (CSOs) are a progressive force for change, or a safety net. Various forms of CSOs are investigated: NGOs and community based organisations, trade unions, political parties and religious groups, as well as more long-standing soviet and traditional institutions and practices. The book contains lessons and perspectives about civil society growth across time, and considers future directions.
