This volume compiles eight original chapters dedicated to different topics within bilingual grammar and processing with special focus on code-switching. Three main features unify the contributions to this volume. First, they focus on making a contribution to our understanding of the human language within a coherent theoretical framework; second, they understand that a complete theory of the human language needs to include data from bilinguals' L-languages; and third, they are committed to obtaining reliable data following experimental protocols.

This is the final volume of an annotated bibliography of French literature. It includes some of France's greatest writers, such as Balzac, Flaubert and Zola. Chapters are devoted either to individual writers, background and general studies, or a particular movement or genre.
