This collection of papers examines a variety of areas and issues related to, or raised by, the EU Internal Security Strategy. It covers such matters as critical infrastructure protection and environmental crime, from a range of disciplinary perspectives, including law, geography and politics. The EU Internal Security Strategy is becoming increasingly complex as it develops over time, as it has to operate against the background of growing diversity in law enforcement systems across EU member states. It is clear that the EU Internal Security Strategy is, and will continue to be for a long time, a work in progress, not only in its aim to address traditional transnational security threats, but also in reacting to emerging concerns, either in new crime areas or issues arising from the implementation of earlier phases of the strategy. This will be a subject matter for many academic discipline areas for some time to come.

In recent years, the EU and its member states have experienced a number of changes, as well as challenges, in the areas of politics, economics, security and law. As these areas are interconnected, changes and challenges to any of them have implications for the others, as well as implications for the populations and institutions of the EU or those coming into contact with its international power and influence. This edited collection focuses primarily on security and law, particularly the EU ' s internal security strategy. The EU ' s Internal Security Strategy, adopted by the Spanish presidency early in 2010,

followed the Lisbon Treaty in 2009, building on previous developments within the EU in the Area of Freedom Security and Justice (AFSJ) policy. The focus of the EU Internal Security Strategy is to prevent and combat “ serious and organised crime, terrorism and cybercrime, in strengthening the management of our external borders and in building resilience to natural and man-made disasters ” . The Internal Security strategy intersects and overlaps with the European Union ’ s Counter-terrorism strategy, the Strategy for the External Dimension of JHA, and the EU ’ s Security Strategy. The role of and interaction between these strategies, their supplementing documents, and their implications for crime, victims, the law, political relations, democracy and human rights, form the backdrop against which the chapters in this collection are written. Building on original research by its contributors, this collection comprises work by authors from a wide variety of academic and professional areas and perspectives, as well as different countries, on a variety of areas and issues related to or raised by the EU ’ s Internal Security Strategy, from intelligence-led policing to human trafficking and port security. This book examines, from a wide variety of disciplinary perspectives including law, geography, politics and practice, both this further refinement of existing internal provisions on cross-border crime, and the increasing external relations of the EU in the AFSJ.

Pakistan faces serious internal security challenges in the form of communal, sectarian, political, ethno-nationalist, Islamist divide and violence as well as ever-increasing terrorist and insurgent attacks. Most of these internal security challenges stem from the ideology of Pakistan and the state's failure to develop an inclusive form of nationalism. Moreover, Pakistan's insistence of using Islamist groups as levers of its foreign and security policy has further complicated the security environment of the nation. The policy of nurturing some militant groups as assets and eliminate those who fight the state has failed. Over the years it has created a society where these militant groups have spread their tentacles and are now well entrenched. How far will the

The challenges to our internal security, in addition to those mentioned above, include VIP security, border management, the problem of refugees, drug trafficking, disaster management, food security, economic security, energy security etc. These challenges have the potential to severely threaten our security fabric. Overcoming these innumerable challenges to internal security in India requires clear, tough and swift policy responses. Key Points: 1. Internal security is emerging as key for economic and political stability of a nation to ensure uninterrupted development and growth. 2. It is vital to ensure that democratic process and institutions of governance remain functional and resilient. 3. Conflict resolution in J&K and North East require a timeline for resolution because both conflicts have the potential to spill over to other regions. 4. LWE is one of the most potent threats that India is facing in the 21st Century. Urban Naxalism is a reality and cannot be brushed aside. 5. Indian Muslim youth is a target for Jihadi ideologues to give impetus to instability in the heartland India. 6. Cyber frontiers are required to be secured to prevent cyber-terrorism. 7. Youth bulge if not managed can become a cause of instability. Thus economic empowerment and engagement of youth is imperative.

National security, in theory and practice, is about governing a nation for the well-being of the people. It is a group subject and is not the domain of a single expert of a kind. It is teamwork under leadership of excellence. What is important is the consistency of purpose providing comfort to the people of a national and thereby the people of the world in their physical, mental and emotional domains as an ongoing process throughout their lives.

Awareness on National Security is vital part of whole UPSC Civil Services Examination. Based on the past experiences, the topic of National Security starts from - Preliminary Examination in the form of objective questions on various defense equipment's or military exercises. - In Main Examination, around 4 questions (50 Marks) of General Studies-III are directly related to the topics covered under National Security. - Finally, in the Interview Stage, at least one interview board member is more likely to ask questions related to internal and external security of India, if not more. So, based on these needs of the examination and past experiences, our book 'National Security Strategy: Securing India Internally and Externally' carries five broad chapters with some other sections to develop a holistic understanding on the internal and external security environment of India. Help is taken from not just the recent National Security perspectives but also from our past with the works of Kautilya (Chanakya) and wise advice's from Mahabharata and other Sages. All of that is condensed to impart information on not just the topics of Civil Service Examination topics, i.e. - Linkages between development and spread of extremism; Role of external state and non-state actors in creating challenges to internal security; Challenges to internal security through communication networks, role of media and social networking sites in internal security challenges, basics of cyber security; money-laundering and its prevention; Security challenges and their management in border areas - linkages of organized crime with terrorism; and Various Security forces and agencies and their mandate But to give detailed perspectives on the

war, national security strategy and future challenges to be faced by India, so that you can develop your own understanding on the whole topic of National Security and answer questions based on greater insights. We would suggest our readers to first have a basic reading of the book and later, segregate the topics for various stages of Civil Services Examination based on the Syllabus given at the start of book and previous year Main Examination questions given at the end of book. The Chapter list of the book is as follows: CHAPTER 1 - Understanding National Security CHAPTER 2 - Conflict, Negotiations and War CHAPTER 3 - Our Leadership Structure & Mandate of Executive Agencies CHAPTER 4 - Challenges to Internal Security of India & Solutions CHAPTER 5 - Challenges to External Security of India & Solutions This book can also be used by avid security learners and aspirants preparing for other competitive examinations like CAPF, CDS, NDA etc.

Challenges to internal security in Europe (including juvenile delinquency, anti-foreigner sentiments, violence, organised crime, etc.) are increasingly affecting public perceptions of safety. This book provides an overview of the challenges to internal security, and argues in favour of a more comprehensive understanding of what internal security entails and what should be kept in mind when looking at crime statistics or when discussing offending behaviour by foreigners. It concludes that public concerns about insecurity need to be taken more seriously and that to meet future security needs, it is necessary to look beyond the traditional confines of police jurisdiction and national territory. Instead, security efforts should address international as well as local challenges that influence subjective feelings of security and affect actual conditions of public safety. In other words, internal security is no longer an internal affair of individual countries. It has become an international concern that requires both local, as well as Europe-wide and global, attention.
