Personal Finance for the Real World teaches the basics of personal finance by involving the reader in various financial exercises and eventually constructing a personal financial plan. Users not only track their spending for a month, but also set personal financial goals and incorporate them into a realistic budget. This book also teaches time-value of money calculations, which enable readers to calculate their necessary monthly savings in order to reach targeted investment goals. This book conducts a thorough review of credit, complete with strategies to pay off credit card and other forms of debt. It features discussions on student debt as well, with particular attention to appropriate pay-down strategies and the financial payoffs to different academic majors. Personal Finance for the Real World immerses users in real and purposeful financial activities, while teaching personal finance vocabulary and encouraging readers to take seriously the financial side of their lives.

Young people face unprecedented financial challenges: rising student debt, stiff competition for jobs, barriers to home ownership, dwindling state benefits and prospects of a longer working life. Today, students need financial knowledge and skills more than ever before, not just to build their own financial security, but to create the new generation of advisers that can help all citizens navigate the complex world of personal finance. Essential Personal Finance is a guide to all the key areas of personal finance: budgeting, managing debt, savings and investments, insurance, securing a home and laying the foundations for retirement. It also provides an introduction to some of the essential foundations of a modern undergraduate finance qualification, including: The nature of financial institutions, markets and economic policy that shape the opportunities and decisions that individuals face. The range of financial assets available to households, the risk-return trade-off, basics of portfolio construction and impact of tax. The importance of the efficient market hypothesis and modern portfolio theory in shaping investment strategies and the limitations of these approaches. Behavioural finance as a key to understanding factors influencing individual and market perceptions and actions. Using financial data to inform investment selection and to create financial management tools that can aid decision-making. A comprehensive companion website accompanies the text to enhance students' learning and includes answers to the end-of-chapter questions. Written by authors who contribute experience as financial advisers, practitioners and academics, Essential Personal Finance examines the motivations, methods and theories that underpin financial decision-making, as well as offering useful tips and guidance on money management and financial planning. The result is a compelling combination of an undergraduate textbook aimed at students on personal finance and financial services courses, and a practical guide for young people in building their own financial strength and capability.
