The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Local governments use their control over land use to generate race and class segregation, benefitting white property owners.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' " Amazing Books " of the Year One of Publishers Weekly' s 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This " powerful and disturbing history " exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a " masterful " (Washington Post) and " essential " (Slate) history of the modern American metropolis, Richard Rothstein' s The Color of Law offers " the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation " (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudices or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning, public housing that purposefully segregated previously mixed communities, subsidies for builders to create whites-only suburbs, tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, " virtually indispensable " study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), The Color of Law forces us to face the obligation to remedy our unconstitutional past.

This powerful and disturbing book clearly links persistent poverty among blacks in the United States to the unparalleled degree of deliberate segregation they experience in American cities. American Apartheid shows how the black ghetto was created by whites during the first half of the twentieth century in order to isolate growing urban black populations. It goes on to show that, despite the Fair Housing Act of 1968, segregation is perpetuated today through an interlocking set of individual actions, institutional practices, and governmental policies. In some urban areas the degree of black segregation is so intense and occurs in so many dimensions simultaneously that it amounts to " hypersegregation. " Douglas Massey and Nancy Denton demonstrate that this systematic segregation of African Americans leads inexorably to the creation of underclass communities during periods of economic downturn. Under conditions of extreme segregation, any increase in the overall rate of black poverty yields a marked increase in the geographic concentration of indigence and the deterioration of social and economic conditions in black communities. As ghetto residents adapt to this increasingly harsh environment under a climate of racial isolation, they evolve attitudes, behaviors, and practices that further marginalize their neighborhoods and undermine their chances of success in mainstream American society. This book is a sober challenge to those who argue that race is of declining significance in the United States today.

Deciding Where to Live: Information Studies on Where to Live in America explores major themes related to where to live in America, not only about the acquisition of a home but also the ways in which where one lives relates to one' s cultural identity. It shows how changes in media and information technology are shaping both our housing choices and our understanding of the meaning of personal place. The work is written using widely accessible language but supported by a strong academic foundation from information studies and other humanities and social science disciplines. Chapters analyze everyday information behavior related to questions about where to live. The eleven major chapters are: Chapter 1: Where to live as an information problem; three contemporary examples Chapter 2: Turning in place: Real estate agents and the move from information custodians to information brokers Chapter 3: The Evolving Residential Real Estate Information Ecosystem: The Rise of Zillow Chapter 4: Privacy, Surveillance, and the " Smart Home " Chapter 5: This Old House, Fixer Upper, and Better Homes & Gardens: The Housing Crisis and Media Sources Chapter 6: A Community Responds to Growth: An Information Story About What Makes for a Good Place to Live; Chapter 7: The Valley Between Us: The meta-hodology of racial segregation in Milwaukee, Wisconsin Chapter 8. Modeling Hope: Boundary Objects and Design Patterns in a Heartland Heterotopia Chapter 9: Home buying in Everyday Life, How Emotion and Time Pressure Shape High Stakes Deciders' Information Behavior Chapter 10. In Search of Home: Examining Information Seeking and Sources That Help African Americans Determine Where to Live Chapter 11: Where to Live in Retirement: A Complex Information Problem While the book is partly about the goal-directed activity of individuals who want to buy a house, and the infrastructure that supports that activity, it is also about personal activities that are either not goal directed or are directed at other goals such as deciding in which geographic location to live, personal entertainment, cultural understanding, or identity formation.
