Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. *New Directions in Child Abuse and Neglect Research* recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. *New Directions in Child Abuse and Neglect Research* identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

Violence against women and children is a serious public health concern, with costs at multiple levels of society. Although violence is a threat to everyone, women and children are particularly susceptible to victimization because they often have fewer rights or lack appropriate means of protection. In some societies certain types of violence are deemed socially or legally acceptable, thereby contributing further to the risk to women and children. In the past decade research has documented the growing magnitude of such violence, but gaps in the data still remain. Victims of violence of any type fear stigmatization or societal condemnation and thus often hesitate to report crimes. The issue is compounded by the fact that for women and children the perpetrators are often people they know and because some countries lack laws or regulations protecting victims. Some of the data that have been collected suggest that rates of violence against women range from 15 to 71 percent in some countries and that rates of violence against children top 80 percent. These data demonstrate that violence poses a high burden on global health and that violence against women and children is common and universal. Preventing Violence Against Women and Children focuses on these elements of the cycle as they relate to interrupting this transmission of violence. Intervention strategies include preventing violence before it starts as well as preventing recurrence, preventing adverse effects (such as trauma or the consequences of

trauma), and preventing the spread of violence to the next generation or social level. Successful strategies consider the context of the violence, such as family, school, community, national, or regional settings, in order to determine the best programs.

Imagine a young boy who has never had a loving home. His only possessions are the old, torn clothes he carries in a paper bag. The only world he knows is one of isolation and fear. Although others had rescued this boy from his abusive alcoholic mother, his real hurt is just beginning -- he has no place to call home. This is Dave Pelzer's long-awaited sequel to *A Child Called "It"*. In *The Lost Boy*, he answers questions and reveals new adventures through the compelling story of his life as an adolescent. Now considered an F-Child (Foster Child), Dave is moved in and out of five different homes. He suffers shame and experiences resentment from those who feel that all foster kids are trouble and unworthy of being loved just because they are not part of a "real" family. Tears, laughter, devastation and hope create the journey of this little lost boy who searches desperately for just one thing -- the love of a family.

Winner of The Restless Books Prize for New Immigrant Writing “ Grace Talusan writes eloquently about the most unsayable things: the deep gravitational pull of family, the complexity of navigating identity as an immigrant, and the ways we move forward even as we carry our traumas with us. Equal parts compassion and confession, *The Body Papers* is a stunning work by a powerful new writer who—like the best memoirists—transcends the personal to speak on a universal level. ” —Celeste Ng, author of *Everything I Never Told You* and *Little Fires Everywhere* Born in the Philippines, young Grace Talusan moves with her family to a New England suburb in the 1970s. At school, she confronts racism as one of the few kids with a brown face. At home, the confusion is worse: her grandfather ’ s nightly visits to her room leave her hurt and terrified, and she learns to build a protective wall of silence that maps onto the larger silence practiced by her Catholic Filipino family. Talusan learns as a teenager that her family ’ s legal status in the country has always hung by a thread—for a time, they were “ illegal. ” Family, she ’ s told, must be put first. The abuse and trauma Talusan suffers as a child affects all her relationships, her mental health, and her relationship with her own body. Later, she learns that her family history is threaded with violence and abuse. And she discovers another devastating family thread: cancer. In her thirties, Talusan must decide whether to undergo preventive surgeries to remove her breasts and ovaries. Despite all this, she finds love, and success as a teacher. On a fellowship, Talusan and her husband return to the Philippines, where she revisits her family ’ s ancestral home and tries to reclaim a lost piece of herself. Not every family legacy is destructive. From her parents, Talusan has learned to tell stories in order to continue. The generosity of spirit and literary acuity of this debut memoir are a testament to her determination and resilience. In excavating such abuse and trauma, and supplementing her story with government documents, medical records, and family photos, Talusan gives voice to unspeakable experience, and shines a light of hope into the darkness.

In this absorbing story of how child abuse grew from a small, private-sector charity concern into a multimillion-dollar social welfare issue, Barbara Nelson provides important new perspectives on the process of public agenda setting. Using extensive personal interviews and detailed archival research, she reconstructs an invaluable history of child abuse policy in America. She shows how the mass media presented child abuse to the public, how government

agencies acted and interacted, and how state and national legislatures were spurred to strong action on this issue. Nelson examines prevailing theories about agenda setting and introduces a new conceptual framework for understanding how a social issue becomes part of the public agenda. This issue of child abuse, she argues, clearly reveals the scope and limitations of social change initiated through interest-group politics. Unfortunately, the process that transforms an issue into a popular cause, Nelson concludes, brings about programs that ultimately address only the symptoms and not the roots of such social problems.
