Sheldon Lu's wide-ranging new book investigates how filmmakers and visual artists from mainland China, Hong Kong and Taiwan have envisioned China as it transitions from a socialist to a globalized capitalist state. It examines how the

Online Library China On

modern nation has been refashioned and re-imagined in order to keep pace with globalization and transnationalism. At the heart of Lu's analysis is a double movement in the relationship between nation and transnationalism in

the Chinese post-socialist state. He considers the complexity of how the Chinese economy is integrated in the global capitalist system while also remaining a repressive body politic with mechanisms of control and

are understood in
contemporary
China, and
provides
illuminating new
insights on the
changing notion of
the individual
through cinema.

What does it mean
for a cinematic
work to be

Online Library China On

"Chinese"? Does it refer specifically to a work's subject, or does it also reflect considerations of language, ethnicity, nationality, ideology, or political orientation? Such questions make any single approach to a vast

Online Library China On

field like "Chinese cinema" difficult at best. Accordingly, The Oxford Handbook of Chinese Cinemas situates the term more broadly among various different phases, genres, and distinct national configurations, while taking care to

Online Library China On

address the
consequences of
grouping together
so many disparate
histories under a
single banner.
Offering both a
platform for cross-
disciplinary
dialogue and a
mapping of
Chinese cinema as
an expanded field,
this Handbook

Online Library China On

presents thirty-three essays by leading researchers and scholars intent on yielding new insights and new analyses using three different methodologies. Chapters in Part I investigate the historical periodizations of

Online Library China On

the field through
changing notions of
national and
political identity --
all the way from
the industry's
beginnings in the
1920s up to its
current forms in
contemporary
Hong Kong,
Taiwan, and the
global diaspora.
Chapters in Part II

Online Library China On

feature studies
centered on the
field's taxonomical
formalities,
including such
topics as the role of
the Chinese opera
in technological
innovation, the
political logic of the
"Maoist film," and
the psychoanalytic
formula of the kung
fu action film.

Online Library China On

Finally, in Part III, focus is given to the structural elements that comprise a work's production, distribution, and reception to reveal the broader cinematic apparatuses within which these works are positioned. Taken together,

Online Library China On

the multipronged approach supports a wider platform beyond the geopolitical and linguistic limitations in existing scholarship. Expertly edited to illustrate a representative set of up to date topics and approaches,

stages.
