The 'Visual Materia Medica of Chinese Herbs' is a concise, organized, and beautiful photo identification guide for over 350 common Traditional Chinese Medicine (TCM) herbs. Used by students, teachers, practitioners, and doctors in universities and clinics around the world, the 'Visual Materia Medica of Chinese Herbs' is the de facto standard for Chinese herb photo identification. Students use it to replace long hours in the herb room or having to carry herb samples. Doctors and practitioners can quickly cross reference Latin, English, and Pinyin names, as well as glance at the Chinese characters, properties, temperatures, and channels. The book has been used for everything from classroom lectures to USDA import inspection. Each Chinese Herb Features: Pinyin name with tone marks Common English name Latin/Pharmaceutical name Chinese name (Chinese characters) Temperature scale Channels entered Herb properties Over 350 hi-res color photos, 32 herb categories, table of contents, multiple indices, 112 pages. The 2nd edition fixes all of the errors since the 1st edition, correcting herbs that were adulterated, replacements, or mislabeled.

Phytotherapy or herbal medicine is the most important therapy within Chinese medicine and is being used increasingly in the West. A Materia Medica for Chinese Medicine: plants, minerals and animal products describes 400 of the most important plants, minerals and animal substances used as treatments by Chinese medical practitioners. The items included have been selected according to their degree of clinical relevance. Each remedy is clearly described and illustrated on two facing pages, making this an easily accessible reference for both students and practitioners of Chinese herbal medicine. The clearly laid out text presents the following details for each herb or substance included: a detailed description of the characteristic features indications for safe use medicinal and toxic effects possible combinations with other substances full-colour illustrations, generally two for each substance, showing the detailed characteristics of the item described A Materia Medica for Chinese Medicine has been written by two medically trained doctors who have worked as TCM therapists specializing in the use of Chinese herbs for more than 30 years. Based on their many years of teaching and practice, the book has been carefully compiled and designed to provide a concise and accurate practice-based reference for both students and practitioners.

This Materia Medica and Herbal Reference has been organized and developed to make Chinese herbology accessible to the Western reader or practitioner. The book also includes extensive use of Chinese herbal formulae and specific treatment of disease conditions. There are a number of useful index listings including Latin name, Chinese name, Chinese herbal formulae and a general index.

The first book to exclusively use Chinese medical theories and terminology to guide practitioners of Chinese medicine in the use of Western herbs ∩ Written entirely according to the theory, diagnosis, and treatment paradigm of traditional Chinese medicine (TCM) ∩ Explains how to combine and modify the standard TCM formulas to non-Chinese herbs suitable for Western practitioners ∩ Includes 58 monographs of common Western healing herbs, detailing how each plant is used clinically The ever-growing number of Chinese medicine practitioners in the West has brought about an amalgamation of many styles of Chinese medicine and various other forms of medicine from around the world. This book addresses the increasing demand for knowledge of how to integrate plants from outside the standard Chinese materia medica into the fold of Chinese medical practices in the West. It is the first in-depth guide to using Western herbs exclusively according to the theories, diagnoses, and treatments of traditional Chinese medicine that harmonizes the unique terminology and theories of TCM with other botanical medicines. The book contains 58 monographs, illustrated with full-color photographs, of herbs commonly used by Western herbalists. Each herb is grouped by the basic categorization for medicinals in Chinese medicine, such as Herbs that Resolve the Exterior and Herbs that Regulate Blood. The monographs detail the energetics, function and indication, channels entered, dosage and preparation, and contraindications of each plant. The author also explains how to use the herbs to modify standard formulas used in everyday Chinese herbal medicine, based on his own clinical experience. An appendix of Western Analogs for Chinese Herbs further highlights 40 Chinese medicinals that have related species growing in the West.

Summary: "Presents the fundamental concepts and materials of traditional Chinese medicine organized in a way that supports learning and teaching according to traditional principles. Each category is placed in the context of traditional theory and practice beginning with a discussion of relevant pathologies (including the correct description of traditional diseases) and therapeutic principles used to address them" -- from the review.

One of the cornerstones of traditional Chinese medicine (TCM), herbal medicine has evolved over centuries of clinical practice and empirical results into a vast body of knowledge encompassing more than 6,000 substances, most of whose effects and uses have been documented and researched. The literature on Chinese medicinal herbs is unparalleled and unsurpassed in the world's medical knowledge; the earliest known pharmacological work was composed before the end of the third century B.C. The first classical Chinese materia medica appeared during the late Han dynasty (25-22- A.D.) and included 365 entries of botanical, zoological, and mineral substances, listing their properties and effects. Subsequent materia medica were assembled during virtually every dynasty from the Liang (456-536 A.D.) to the Qing (1645-1911). Among the major treatments published during these centuries was the 30-volume Materia Medica Arranged According to Pattern, which had 1558 entries, more than 3,000 formulae, and became the official pharmacopoeia of herbal medicine in China for 500 years. n Illustrated Chinese Materia Medica brings to the English language a lavishly illustrated atlas of the 320 herbs used most frequently in traditional Chinese medical practice. Each substance is profiled authoritatively in monographs that provide pharmaceutical, botanical and English names; flavor properties and channel tropisms; functions; clinical uses and major combinations; dosage and administration; and precautions. Intended for medicinal and pharmaceutical chemists as well as practitioners of homeopathic and alternative medicines, this materia medica offers a unique blend of authenticity that is derived from knowledge of classical Chinese literature with a clearly practical objective of presenting valuable information in a straightforward, easily comprehensible style.
