Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

# Online Library Church And Manor Study In English Economic History

Excerpt from Church and Manor: A Study in English Economic History Of late years various books relating to the unit of English territorial organisation known as the manor have appeared. Two or three of these deal with short periods, such as the eleventh or the thirteenth century, and the late Mr. Seebohm, in a masterly investigation, has surveyed a considerable part of the field. Notwithstanding the good work that has been done, an essential part of the

## Online Library Church And Manor Study In English Economic History

subject has been omitted, or misunderstood. The manor and the ecclesiastical benefice have been regarded as entirely independent things. But the economic history of mediaeval England will gain much in simplicity if it can be shown that lord and priest were once the same person; that the hall cannot at an early time be distinguished from the church; and that ecclesiastical benefices were themselves manors, with all the privileges which belonged to feudal lordship. No treatment of the economic history of these islands can be satisfactory unless it includes the church-building and the benefice within its scope. To describe the scattered acres of the open fields, with all the complicated belongings of the village community, and yet leave out the building near which the frail and mud-built houses of the inhabitants were

## Online Library Church And Manor Study In English Economic History

gathered, is to omit the chief point of interest, for the church was not only the place of worship but also the seat of local government. It has been thought desirable to treat the evidence from architecture, as found in existing remains or referred to in documents, in considerable detail, because, if it can be proved that the church-fabric was evolved from the hall or lord's dwelling, a strong presumption arises, on that ground alone, that the benefice was the manor. the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works."

An account of the daily and yearly round of the English peasant in the Middle Ages.

Conventional wisdom suggests that theology is necessarily unfriendly to the liberal state, but neither philosophical

## Online Library Church And Manor Study In English Economic History

analysis nor empirical argument has convincingly established that conclusion. Examining the problem from a variety of perspectives, including law, philosophy, history, political theory, and religious studies, the essays in *Theology and the Soul of the Liberal State* suggest the possibilities for and limits on what theological reflection might contribute to liberal polities across the globe.

"*Lordship and Faith* takes as its subject the many hundreds of parish churches built in England in the Middle Ages by the gentry, the knights and esquires, and the lords of country manors. Nigel Saul uses lordly engagement with the parish church as a way of opening up the piety and sociability of the gentry, focusing on the gentry as founders

## Online Library Church And Manor Study In English Economic History

and builders of churches, worshippers in them, holders of church advowsons, and patrons and sponsors of parish communities. Saul also looks at how the gentry's interest in the parish church sat alongside their patronage of the monks and friars, and their use of private chapels in their manor houses. *Lordship and Faith* seeks to weave together themes in social, religious, and architectural history, examining in all its richness a subject that has hitherto been considered only in journal articles. Written in an accessible way, this volume makes a significant contribution not only to the history of the English gentry but also to the history of the rural parish church, an institution now in the forefront of medieval historical studies" --
