whether the poorest workers and families benefited from the tight labor markets and good economic times of the late 1990s. Following black and Latino workers in Harlem, who began their work lives flipping burgers, she finds more good news than we might have expected coming out of a high-poverty neighborhood. Many adult workers returned to school and obtained trade certificates, high school diplomas, and college degrees. Their persistence paid off in the form of better jobs, higher pay, and greater self-respect. Others found union jobs and, as a result, brought home bigger paychecks, health insurance, and a pension. More than 20 percent of those profiled in Chutes and Ladders are no longer poor. A very different story emerges among those who

floated even in a good economy. Weighed down by family obligations or troubled partners and hindered by poor training and prejudice, these "low riders" moved in and out of the labor market, on and off public assistance, and continued to depend upon the kindness of family and friends. Supplementing finely drawn ethnographic portraits, Newman examines the national picture to show that patterns around the country paralleled the findings from some of New York's most depressed neighborhoods. More than a story of the shifting fortunes of the labor market, *Chutes and Ladders* asks probing questions about the motivations of low-wage workers, the dreams they have for the future, and their understanding of the rules of the game.

vulnerable workers. In contrast, *Producing and Negotiating Non-Citizenship* considers a range of people whose pathway to citizenship is uncertain or non-existent. This includes migrant workers, students, refugee claimants, and people with expired permits, all of whom have limited formal rights to employment, housing, education, and health services. The contributors to this volume present theoretically informed empirical studies of the regulatory, institutional, discursive, and practical terms under which precarious-status non-citizens – those without permanent residence – enter and remain in Canada. They consider the historical and contemporary production of non-citizen precarious status and migrant illegality in Canada, as well as

This timely volume contributes to conceptualizing multiple forms of precarious status non-citizenship as connected through policy and the practices of migrants and the institutional actors they encounter.

The signs are everywhere: Economic crisis, dramatic hurricanes, floods, earthquakes, and increased rates of species extinction. According to New Age metaphysician David Ian Cowan, we are in the midst of a 25-year transitional period of planetary shift as our solar system approaches the Galactic Photon Band, a shift that is also affecting our perception of time. The Mayans had a term for this

transitional period: the “Time of No Time, ” indicating that, post-2012, time as we know it or experience it may not exist at all or will have changed dramatically. In *Navigating the Collapse of Time*, Cowan synthesizes a broad range of perspectives about this time of transition, from the writings of the ancient Mayans, Aztecs, and Incas, to speculative theory, quantum physics, philosophy, and the nature of illusion and reality posed by a range of theorists and academics including Ken Carey, Barbara Hand Clow, William Gammill, Zecharia Sitchin, Carl Calleman, Gary Renard, Ken Wapnick, Brent Haskel, and many others. He also lets us know what to expect as events continue to unfold and how to navigate this time of change.

"The United States used to be a country where ordinary people could expect to improve their economic condition as they moved through life. For millions of us, this is no longer the case. Many Americans today have a lower standard of living as adults than they had in their parents' homes as children.... This book is about restoring the upward mobility of U.S. workers. Specifically, it addresses the workforce-development strategy of creating not just jobs, but career ladders."--from Moving Up in the New Economy Career-ladder strategies create opportunities for low-wage workers to learn new skills and advance through a progression of higher-skilled and better-paid jobs.

Career-ladder programs could provide opportunities for upward mobility and also stave off impending national shortages of skilled workers. But there are a variety of obstacles that must be faced candidly if career-ladder programs are to succeed. In *Moving Up in the New Economy*, Joan Fitzgerald explores specific programs in different sectors of the economy--health care, child care, education, manufacturing, and biotechnology--to offer a comprehensive analysis of this innovative approach to job training. Throughout the nonprofit sector, successes are celebrated and mistakes tend to be deliberately forgotten. But, as *Mistakes to Success: Learning and Adapting When Things Go Wrong* makes clear, this is a lost opportunity. Discussing, analyzing and learning from mistakes should be a common practice, which can strengthen the work of nonprofits. Breaking new ground, *Mistakes to Success* provides a rich collection of revealing essays focused on failures in the field of community economic development. The authors, leaders in
