Intended for both general readers and students, Peter Riesenbergs instructive book surveys Western ideas of citizenship from Greek antiquity to the French Revolution. It is striking to observe the persistence of important civic ideals and institutions over a period of 2,500 years and to learn how those ideals and institutions traveled over space and time, from the ancient Mediterranean to early modern France, England, and America.

literature of early modern Europe. Bodin and Grotius are cited, as well as the statutes of many Italian city-states. Notably, it examines the litigation surrounding citizenship as revealed in the consilia, an enormous body of medieval case law.

In this groundbreaking work, Ellen Meiksins Wood rewrites the history of political theory. She traces the development of the Western tradition from classical antiquity through to the Middle Ages in the perspective of social history—a significant departure not only from the standard abstract history of ideas but also from other contextual methods. Treating canonical thinkers as passionately engaged human beings, Wood examines their ideas not simply in the context of political languages but as creative responses to the social relations and conflicts of their time and place. She identifies a distinctive relation between property and state in Western history and shows how the canon, while largely the work of members or clients of dominant classes, was shaped by complex interactions among proprietors, labourers and states. Western political theory, Wood argues, owes much of its vigour, and also many ambiguities, to these complex and often contradictory relations. From the Ancient Greek polis of Plato, Aristotle, Aeschylus and Sophocles, through the Roman Republic of Cicero and the Empire of St Paul and St Augustine, to the medieval world of Averroes, Thomas Aquinas and William of Ockham, Citizens to Lords offers a rich, dynamic exploration of thinkers and ideas that have indelibly stamped our modern world.

Reflections on Citizenship and Multiculturalism in Contemporary Western Liberal Democracies explores the classical understanding of citizenship in dialogue with liberal contractual theorists and multicultural theorists in an effort to understand the complexity and diversity of perspectives on citizenship.

A revolutionary approach to the history of political theory. In this groundbreaking work, Ellen Meiksins Wood lays out her innovative approach to the history of political theory and traces the development of the Western tradition from classical antiquity through the late Middle Ages. Her "social history" is a significant departure from other contextual interpretations. Treating canonical thinkers as passionately engaged human beings, Wood examines their ideas not simply in the context of political discourse but as creative responses to the social relations and conflicts of their time and place. From the Ancient Greek polis of Plato and Aristotle, through the Roman Republic of Cicero and the Empire of St. Paul and St. Augustine, to the medieval world of Averroes, Thomas Aquinas and William of Ockham, Citizens to Lords offers a rich, dynamic exploration of thinkers and ideas that have stamped their imprint upon history and the present day.

The cosmopolitan political tradition defines people not according to nationality, family, or class but as equally worthy citizens of

the world. Martha Nussbaum pursues this “ noble but flawed ” vision, confronting its inherent tensions over material distribution, differential abilities, and the ideological conflicts inherent to pluralistic societies.

This book provides a comprehensive overview of the meaning of cosmopolitanism and world citizenship in the history of Western political thought, and in the evolution of international politics since 1500. Providing an invaluable overview of earlier political thought, recent theoretical literature and current debates, this book also discusses recent developments in international politics and transnational protest. It will be of great interest to those specialising in political theory, International Relations and peace/conflict studies. It will also interest those already acting as global citizens.

Today, all industrialized states are multinational. However, as Political Sociologist Feliks Gross points out, there remains considerable debate and experimentation on how to organize a multiethnic, democratic, and humane state. In the past, minorities were usually formed as a consequence of conquest or migration; minorities tended to have an inferior status, subordinated to the ruling, dominant ethnic class. Only Rome and the United States provide examples of successful multiethnic states of continental dimensions. Gross examines various types of multiethnic states as well as their early origins and prospects for success.
