"Chireau has written a marvelous text on an important dimension of African American religious culture. Expanding beyond the usual focus of scholarship on Christianity, she describes and analyzes the world of magical-medical-religious practice, challenging hallowed distinctions among "religion" and "magic." Anyone interested in African American religion will need to reckon seriously with Chireau's text on conjure."—Albert J. Raboteau, Princeton University "Deprived of their own traditions and defined as

chattel, enslaved Africans formed a new orientation in America. Conjuring—operating alongside of and within both the remnants of African culture and the acquired traditions of North America—served as a theoretical and practical mode of deciphering and divining within this, enabling them to create an alternate meaning of life in the New World. Chireau's is the first full-scale treatment of this important dimension of African American culture and religion. A wonderful book!"—Charles H. Long, Professor of History of Religions University of California, Santa Barbara and author of *Significations: Signs, Symbols and Images in the Interpretation of Religion*

In this valuable book, Hanna M. Roisman provides a uniquely comprehensive look at Euripides' *Hippolytus*. Roisman begins with an examination of the ancient preference for the implicit style, and suggests a possible reading of Euripides' first treatment of the myth which would account for the Athenian audience's reservations about his *Hippolytus Veiled*. She proceeds to analyze significant scenes in the play, including Hippolytus' prayer to Artemis, Phaedra's delirium, Phaedra's "confession" speech, and the interactions between Theseus and Hippolytus. Concluding with a discussion of the meaning of the tragic in *Hippolytus*, Roisman questions the applicability in this case of the idea of the tragic flaw. *Nothing Is as It Seems* includes extensive comparisons of Euripides' play with the *Phaedra* of Seneca. This is a very important book for students and scholars of Greek tragedy, literature, and rhetoric.

This volume seeks to advance the study of ancient magic through separate discussions of ancient terms for ambiguous or illicit ritual, the ancient texts commonly designated magical, and contexts in which the term magic may be used descriptively.
