This title is out of print as of 03/02/2005. A new revised and updated edition: Secrets of Methamphetamine Manufacture, 7th Edition, will be available as of 03/08/2005.

The best book ever written in the field of clandestine chemistry has just gotten better in a new 8th edition. I have trained the champions of the field of clandestine chemistry for over 20 years, and this book gives the new techniques required for this constantly evolving field. I have uncovered a very easily done and supplied method for cooking your own ephedrine and pseudoephedrine from health food store and hardware store materials. This completely eliminates the need to show ID and buy adulterated and expensive pills containing these materials. I have also reconfigured older recipes to make use of the weaker or polluted materials now commonly found on hardware store shelves. This 8th edition shows the futility of politically motivated attempts by pandering politicians to regulate the private lives of individuals.

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedureuses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads todetermine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacture's blower performance tables). This assures that appropriate airflow is delivered toall rooms and spaces; and that system airflow is compatible with the operatingrange of primary equipment. The capabilities and sensitivities of this procedureare compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or avariable-speed blower (ECM or constant torque motor, or a true variable speed motor).Edition Three, Version 2.50 of Manual D (D3) specifically identifiesnormative requirements, and specifically identifies related informative material.

"Once upon a Time" Is Timeless The year is 1880, and Bertie, having just arrived in New York with her family, is grateful to be given work as a seamstress in the home of textile tycoon J. P. Wellington. When the Wellington family fortune is threatened, Bertie's father boasts that Bertie will save the business, that she is so skillful she can "practically spin straw into gold." Amazingly, in the course of one night, Bertie creates exquisite evening gowns -- with the help of Ray Stalls, a man from her tenement who uses an old spinning wheel to create dresses that are woven with crimson thread and look as though they are spun with real gold. Indebted to Ray, Bertie asks how she can repay him. When Ray asks for her firstborn child, Bertie agrees, never dreaming that he is serious...
