bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and

Combating Fake News An

Agenda For Research And Action

what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of "alternative facts", this is a fascinating and vital reading for students and

Over the last five years, widespread concern about the effects of social media on democracy has led to an explosion in research from different disciplines and corners of academia. This book is the first of its kind to take stock of this emerging multi-disciplinary field by synthesizing what we know, identifying what we do not know and obstacles to

future research, and charting a course for the future inquiry. Chapters by leading scholars cover major topics - from disinformation to hate speech to political advertising - and situate recent developments in the context of key policy questions. In addition, the book canvasses existing reform proposals in order to address widely perceived threats that social media poses to democracy. This title is also available as Open Access on Cambridge Core.

Truth qualities of journalism are under intense scrutiny in today's world.

Journalistic scandals have eroded public confidence in mainstream media while pioneering news media compete to satisfy the public's appetite for news. Still worse is the specter of "fake news" that looms over media and political systems that underpin everything from social stability to global governance. This volume aims to illuminate the contentious media landscape to help journalism students, scholars, and professionals understand contemporary conditions and arm them to deal with a spectrum of new developments ranging from technology and politics to

best practices. Fake news is among the greatest of these concerns, and can encompass everything from sarcastic or ironic humor to bot-generated, made-up stories. It can also include the pernicious transmission of selected, biased facts, the use of incomplete or misleadingly selective framing of stories, and photographs that editorially convey certain characteristics. This edited volume contextualizes the current "fake news problem." Yet it also offers a larger perspective on what seems to be uniquely modern, computer-driven problems. We must remember that we have lived

with the problem of people having to identify, characterize, and communicate the truth about the world around them for millennia. Rather than identify a single culprit for disseminating misinformation, this volume examines how news is perceived and identified, how news is presented to the public, and how the public responds to news. It considers social media's effect on the craft of journalism, as well as the growing role of algorithms, big data, and automatic content-production regimes. As an edited collection, this volume gathers leading

Combating Fake News An

Agenda For Research And Action

research and writing on journalism and news media, leading scholar Brian McNair engages with the fake news phenomenon in accessible, insightful language designed to bring clarity and context to a complex and fast-moving debate. McNair presents fake news not as a cultural issue in isolation but rather as arising from, and contributing to, significant political and social trends in twenty-first century societies. Chapters identify the factors which have laid the groundwork for fake news' explosive appearance at this moment in our globalised public sphere. These include the rise of

Action

relativism and the crisis of objectivity, the role of digital media platforms in the production and consumption of news, and the growing drive to produce online content which attracts users and generates revenue. The book also considers the decline of trust in journalism, and the how the traditional left critique of 'dominant ideology' and 'ruling elites' in media has been appropriated by the alt-right, nationalists and populists all over the world. This book rejects the left-right division in discussion of what is and is not 'fake news'. Rather, it

Word matters and is the foundation for dialogue and democracy and so is trust. Thus, the phenomenon "Fake News" understood as propaganda, lies, disinformation and fake factory stories are serious threats to our democracies. The Nordic Council of Ministers urges for finding ways to meet this challenge and is launching a booklet to create a debate on how to counter fakes and build trust in words and facts. The booklet is based upon results from a meeting in September 2017 of a high-level group of key experts on the topic and in

particular from four experts contributing by focusing on media and information literacy, ethical standards and quality journalism to be among the best tools to counter fakes. This booklet will be launched at the UNESCO World Press Freedom Day 2018 in Accra asking for international feedback on its recommendations.

Big, unexpected changes are here to stay. Slow, incremental change has become a relic of the past. Today's shifts come fast and big, what Darrell West calls megachanges, in which dramatic disruptions in trends and policies occur on

Action

a regular basis. Domestically, we see megachange at work in the new attitudes and policies toward same-sex marriage, health care, smoking, and the widespread legalization of marijuana use. Globally, we have seen the extraordinary rise and then collapse of the Arab Spring, the emergence of religious zealotry, the growing influence of nonstate actors, the spread of ISIS-fomented terrorism, the rise of new economic and political powers in Asia, and the fracturing of once-stable international alliances. Long-held assumptions have been

Combating Fake News An

shattered, and the proliferation of unexpected events is confounding

experts in the United States and around the globe. Many of the social and political institutions that used to anchor domestic and international politics have grown weak or are in need of dramatic reform. What to do? West says that we should alter our expectations about the speed and magnitude of political and social change. We also need to recognize that many of our current governing processes are geared to slow deliberation and promote incremental change, not large-scale transformation. With

Combating Fake News An

megachange becoming the new normal, our domestic and global institutions must develop the ability to tackle the massive economic, political, and social shifts that we face.

Over the last few years, social media has expanded to become a key platform for news dissemination and circulation, and a key originator and propagator of 'fake news'.. Nations, governments, organisations and societies are now coming to terms with the unpredictable and debilitating consequences of fake news. The propagation of news containing

Agenda has been linked to an increase in measles cases, surges in youth crimes, the spread of pseudo-science, compromised national security, and more. Some even perceive it as a global threat to democratic systems around the world. In this book, the authors examine factors influencing the spread of fake news, and suggest ways to combat it by exploring the key elements which enable and facilitate this phenomenon.
