Comparativists come from a range of disciplinary backgrounds and therefore come to the field with different subject expertise and ideas about how best to conduct research in the field.

Comparative and International Education | BERA

A comparative study is made of the rules of international private law relating to arbitration, especially issues on international jurisdiction. Despite of recent development of unification of law on arbitration such as the 1958 New York Convention and the UNCITRAL Model Law, there are few rules in this area.

Global Courses. To deepen the interdisciplinary critical transnational approach introduced in ICS 195, majors complete four courses chosen from an ICS-approved list of global courses, or taken during a study abroad program. These courses were previously labeled "comparative." The four Global courses must originate from at least two disciplinary or interdisciplinary departments (which is how Duke courses are listed on the ICS course page) and meet ICS global criteria.

The Centre for Comparative and International Education at the University of Oxford is an internationally-recognised interdisciplinary research centre dedicated to the study of educational systems around the world. Since its inception more than 20 years ago, the Centre has advanced public dialogue about the challenges to educational change, reform and reconstruction in low-and middle-income countries, and the crises and changing faces of educational systems in other parts of the world.

Comparative and International Education

Comparative education is often used interchangeably with international education. While these two fields certainly overlap, it can be argued that they are two distinct areas of study. There has been a long history of debate CHAPTER 1

As a matter of international law, the Convention on the Rights of the Child (CRC) addresses the human rights of children in the context of migration. 16 The CRC takes a child rights-based approach that recognizes that the detention of migrant children runs counter to both their ' best interests ' and the government ' s obligation to ' ensure to the maximum extent possible the survival and ...

International Comparative Research: Social Structures and Public Institutions in Eastern and Western Europe is a seven-chapter book prepared for the Second International Seminar on Cross-National Comparative Research. Chapters 1 and 2 describe developments in comparative research on social structure and comparisons of social mobility in different socio-economic systems. Subsequent chapters explore structural changes and mobility in a capitalist and a socialist society; comparative research on public institutions; a comparative perspective on social problems and the law; and comparison of publi.

This collection examines the risks and social opportunities created by the growth of information and communication technologies. In particular, the contributors analyze how digital inclusion is affected by the social and cultural contexts of access around the world.

This authoritative book examines the what, why and how of international comparative research. It offers a comprehensive topic-based overview of the theory and practice of comparative research and addresses the possible concerns of those both funding the research and using the findings. Drawing on illustrations from the extensive international literature as well as real-life comparative studies, the chapters guide readers through the many stages in the research process, from research design and data collection to the analysis and interpretation of findings. In a book that crosses national, societal, cultural and disciplinary boundaries, the author: • Pinpoints practical problems and directs readers to tried and tested solutions, including multiple method strategies. • Draws on examples of policy transfer to examine how comparative research can inform policy making • Provides guidance on the management of international research teams and projects. This resource is the ultimate reference tool for students, researchers and practitioners undertaking comparative research projects in international settings across the social sciences and humanities.

Comparative studies in information and library science published in the past ten years have reflected a broad spectrum of backgrounds, interests, and issues, but until now services between different countries, Asian nations in particular, have never been gathered or organized into a single source. As demand from researchers, students, directors, and practitioners for pertinent literature continues to grow, there is a definite and increasing need for a focused guide to international and comparative librarianship. International and Comparative Studies in Information and Library Science: A Focus on the United States and Asian Countries consists of eighteen previously published articles divided into seven categories that address issues such as research methodologies; information policy; professional education; information organization; and school, academic, and public libraries. It also features a comprehensive bibliography of related articles, books, proceedings, and other publications in both English and Chinese and four appendixes that list curricula, journal titles, conferences, and websites relating to International and comparative librarianship available at the time of publication. With this important compilation, Yan Quan Liu and Xiaojun Cheng fill an important and previously unmet need. Book jacket.

There are 100 million students in higher education throughout the world today. This collection provides some indication of what are they are learning and of their wider experiences. It also outlines the changing global context of provision for undergraduate students as countries and universities respond to what they anticipate will be new demands f

Comparative study

The question of quality has become one of the most important framing factors in education and has been of growing interest to international organisations and national policymakers for decades. Politics of Quality in Education focuses on Brazil, China, and Russia, part of the so-called emerging nations ' BRICS block, and draws on a four-year project to develop a new theoretical and methodological approach. The book builds a comparative, sociohistorical, and transnational understanding of political relations in education, with a particular focus on the policies and practices of Quality Assurance and Evaluation (QAE). Tracking QAE processes from international organisations to individual schools, contributors analyse how QAE changes the dynamics in the roles of state, expertise, and governance. The book demonstrates how national and sub-national actors play a central role in the adaptation, modification or rejection of transnational policies. Politics of Quality in Education will be of great interest to academics, researchers and postgraduate students engaged in the study of comparative and international education, as well as educational policy and politics. It should also be essential reading for practitioners and policymakers. The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351362528>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.
