Collect stones, pebbles, and shells, and adorn your garden and home with these beautiful pebble mosaics! Experiment with textures, design, and color to create some stunning feature pieces and decorate your garden and home. A The mosaic has long been a stunning method of decoration, stretching back to the cities of ancient Greece and Rome, and now, with Pebble Mosaics, you can create your own little piece of history in your home! Learn how to find and forage ceramics, stones, and pebbles in your back garden and home, and arrange them to make the 25 beautiful and original designs packed inside Pebble Mosaics. Complete with a "Gallery" section to inspire your creativity, there will be a pattern or a project to suit every need and any taste. A Pebble Mosaics A is split into two chapters. The first, "Paths, Plaques, and Panels", will take you through creating mosaics for larger projects such as Stepping Stones, Garden Benches, Sundials, and Evening Tables. You will learn how to mix cement, identify good materials for your project, and construct patterns that suit you. The second chapter, "Planters and Decorative Features", will show you how to make some beautiful ornamental items, such as a Bubbling Fountain, a Lattice Planter, and Hurricane Lanterns. With easy-to-follow step-by-step instructions and photography, Pebble Mosaics is suitable for even the most novice of pebble-layers.

Demonstrates traditional mosaic patterns and techniques with instructions for sixteen projects inspired by historical sources, covering materials, equipment, cutting, grouting, and sealing

The appliances we use, the lights we turn on; these two items alone in our homes can account for upwards of 40% of our total energy bill. For those who want to save money (and who doesn't!) by becoming more energy efficient and for those who want to go a step further and embrace the latest strategies in renewable and alternative energy systems, Insulate and Weatherize is about to lead the way. It's been 10 years since the smash hit of the first edition of Insulate and Weatherize. In this completely revised and expanded edition, the advances in science and technology shine brightly to walk homeowners through the many solutions for basic energy, air-flow problems, heating and cooling systems, appliances and lights, mixed climate issues and alternative energy strategies that are doable and extremely efficient. With Insulate and Weatherize at hand, home energy costs won't soar through the roof, especially if there's a solar panel or two on it.

erials, laying a simple mosaic, creating and using various designs including shapes for stars, flowers, trees, birds and borders, as well as advanced ideas for plaques, figures, and pictures. 100 full-color photos, 60 black-and-white motifs and diagrams.

Like Douglas Hofstadter ' s G del, Escher, Bach, and David Berlinski ' s A Tour of the Calculus, Euclid in the Rainforest combines the literary with the mathematical to explore logic—the one indispensable tool in man ' s quest to understand the world. Underpinning both math and science, it is the foundation of every major advancement in knowledge since the time of the ancient Greeks. Through adventure stories and historical narratives populated with a rich and quirky cast of characters, Mazur artfully reveals the less-than-airtight nature of logic and the muddled relationship between math and the real world. Ultimately, Mazur argues, logical reasoning is not purely robotic. At its most basic level, it is a creative process guided by our intuitions and beliefs about the world.

Unlike many books on painting that usually talk about art or painters, James Elkins ' compelling and original work focuses on alchemy, for like the alchemist, the painter seeks to transform and be transformed by the medium. In What Painting Is, James Elkins communicates the experience of painting beyond the traditional vocabulary of art history. Alchemy provides a magical language to explore what it is a painter really does in her or his studio - the smells, the mess, the struggle to control the uncontrollable, the special knowledge only painters hold of how colours will mix, and how they will look. Wwritten from the perspective of a painter-turned-art historian, What Painting Is is like nothing you have ever read about art.

“ Wonderful . . . One of the finest memoirs I ' ve read. ” — Philip Caputo, Washington Post In the summer of 2006, racing through Lebanon to report on the Israeli invasion, Anthony Shadid found himself in his family ' s ancestral hometown of Marjayoun. There, he discovered his great-grandfather ' s once magnificent estate in near ruins, devastated by war. One year later, Shadid returned to Marjayoun, not to chronicle the violence, but to rebuild in its wake. So begins the story of a battle-scarred home and a journalist ' s wounded spirit, and of how reconstructing the one came to fortify the other. In this bittersweet and resonant memoir, Shadid creates a mosaic of past and present, tracing the house ' s renewal alongside the history of his family ' s flight from Lebanon and resettlement in America around the turn of the twentieth century. In the process, he memorializes a lost world and provides profound insights into a shifting Middle East. This paperback edition includes an afterword by the journalist Nada Bakri, Anthony Shadid ' s wife, reflecting on his legacy. “ A poignant dedication to family, to home, and to history . . . Breathtaking. ” — San Francisco Chronicle “ Entertaining, informative, and deeply moving . . . House of Stone will stand a long time, for those fortunate enough to read it. ” — Telegraph (London)

With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.
