Standards apply the concepts in specific situations — for example, accounting for financial instruments, leases and inventory. The standards setters base new accounting standards, and amendments to old, on the conceptual framework. Standards take precedence in the event of conflict as the Conceptual Framework.

Explores advanced accounting concepts & policies by applying them to a range of contemporary accounting issues. Authors: Rankin, Monash University & previously RMIT & University of Southern Queensland; Stanton, University of Newcastle; McGowan, University of South Australia; Ferlauto, University of Western Sydney; Tilling, University of Notre Dame.

Contemporary Issues in Accounting 2nd Edition is suited to a wide range of courses, particularly relevant to advanced financial accounting subjects at both an undergraduate and postgraduate level. It considers a broad range of financial accounting issues facing contemporary businesses from a range of perspectives, including appropriate theories and research findings. The 2nd edition examines the regulatory setting within which accounting operates from the context of the process of standard setting and the Conceptual Framework. Within this framework one of the most controversial areas of accounting - measurement - is examined in detail. Alternative measurement choices are considered, with intangibles and sustainability reporting being examined in more detail as they are areas with unique measurement challenges. With the increasing use of fair value measurement, we present a comprehensive analysis of this measurement basis, including its application in specific contexts.

Contemporary Issues in Accounting, 3rd Edition is the perfect text for students studying advanced financial accounting subjects at both an undergraduate and postgraduate level. This is the most up-to-date Australian textbook on the market and considers a broad range of financial accounting issues facing contemporary businesses from a range of perspectives, including appropriate theories and research findings. This edition has been updated to reflect the current challenges of the industry, with expanded coverage on ethics and sustainability. It takes into account the 2019 changes to the Conceptual Framework and the standards have been updated to include a focus on global standard setting (IFRS/FASB). The new edition will include a brand new chapter on technology, covering issues such as digital technology and disruption, the range of technologies available for accountants, the impact of digital technology, the impact of AI and big data, and the ethics and governance issues associated with digital technology in accounting.

How does the contemporary restructuring of health care affect nursing practice? Increasingly since the 1970s, and more intensively under recent reforms, Canadian health care is the focus of information-supported, professionally based management. In *Managing to Nurse*, Janet M. Rankin and Marie L. Campbell probe the operation of this new form of hospital and its effect management on nurses and nursing. Written from the nurse's perspective, this institutional ethnography discovers a major transformation in the nature of nursing and associated patient care: the work is now organized according to an accounting logic that embeds a cost-orientation into care-related activities. Rankin and Campbell illustrate how nurses adapt to this new reality just as they, themselves, perpetuate it - how they learn to recognize their adaptations as professionally correct and as an adequate basis for nursing judgement. Although *Managing to Nurse* may contradict contemporary beliefs about health care reform, the insiders' account that it provides is undeniable evidence that nurses' caring work is being undermined and patient care is being eroded, sometimes dangerously, by current health care agendas.

A groundbreaking survey on gender development and identity-making among America's transsexual women, transsexual men, cross-dressers and gender-queer individuals.

This volume explores the opportunities and challenges facing the accounting profession in an increasingly globalized business and financial reporting environment. It looks back at past experiences of the profession in attempting to meet its public interest obligation. It examines the role and responsibilities of accounting to society including regulatory requirements, increased emphasis on corporate social responsibility, accounting fraud and whistle-blowing implications, internationalization of public interest obligations, and providing the education needed to be successful. The book incorporates an ethical dimension in making these assessments. Its focus is a conceptual, theoretical one drawing on classical philosophy, the sociology of professions, economic theory, and the public interest dimension of accountants as professionals. The authors of papers are long-time contributors to the annual symposium on Research in Accounting Ethics sponsored by the Public Interest Section of the AAA.

The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.

Sustainability Accounting and Integrated Reporting deals with organizations' assessment, articulation and disclosure of their social and environmental impact on various groups in society. There is increasingly an understanding that financial information does not sufficiently discharge organizational accountability to members of society who are demanding an account of the social and environmental impacts of companies' and other organizations' activities. As a result, organizations report ever more social and environmental information, and there are simultaneous movements towards providing the information in an integrated fashion, showing how social and environmental activities influence each other, members of society and the financial aims of the organization. The book Sustainability Accounting and Integrated Reporting provides a broad and comprehensive review of the field, focusing on the interconnection between different elements of these topics, often dealt with in isolation. The book examines the accounting involved in the collection and analysis of data, control processes over the data, how information is reported to external parties, and the assurance of the information being reported. The book thereby provides an overview useful to practitioners (including sustainability managers, consultants, members of the accounting profession, and other assurance providers), academics, and students.

This bestselling introduction to accounting is now in its ninth edition, setting the standard for accounting education in Australia / New Zealand. The book is updated throughout to better integrate financial and management accounting.*Give non-accounting managers a better understanding of how accountants see their business with re-written Financial Accounting chapters*Focus on the decision-making needs of the non-accounting manager with re-worked Management Accounting chapters. The best learning technology package on offer for students includes CNOW - more control in less time. Students are empowered with the Diagnostic Personalised Study Plan. Instructor supports include case studies to expand Accounting teaching into wider concepts. Lead author Prof Phil Hancock (UWA), Peter Robinson (Curtin) and Dr Peta Stevenson-Clark (RMIT) worked together to develop a premier blended learning technology package to maximise pedagogical benefit for students. For a one-semester course at undergraduate or MBA level, for both accounting and non-accounting majors.
