Prepared by attending physicians at Harvard Medical School, Pocket ICU, follows the style of Pocket Medicine, one of the best-selling references for medical students, interns, and residents. This pocket-sized loose-leaf resource can be used on the wards or in the operating room. Information is presented in a schematic, outline format, with diagrams and tables for quick, easy reference. Content coverage is brief but broad, encompassing all the subspecialty areas of critical care including adult and pediatric critical care, neuro-critical care, cardiac critical care, transplant, burn, and neonatal critical care.

This practical, easy-to-use reference facilitates the administration of 39 of the most complex and common IV infusion drugs used in critical care. Section I presents at-a-glance algorithms covering the ACLS Guidelines for Adult Emergency Cardiac Care. Section II offers a "Quick Mixing Guide" for intravenous infusion drugs. And, Section III covers each of the most complex and common IV infusion drugs in detail, presenting all of the data needed for safe administration. Coverage of each drug addresses its most common uses - preparation and administration - dosages - warnings and adverse reactions - compatibility with other drug infusions - and general nursing considerations. "Drip Rate Calculation Charts" and "Dosing Charts" quickly explain how to mix and prepare drugs that are usually needed by patients on an immediate, urgent basis. Unique "Calculation Factors" for each drug greatly simplify an otherwise complicated process and substantially reduce the chance of medication errors.

This guide is designed with the special needs of field practitioners in mind. This useful, quick reference guide helps speed recognition of lab values, 12 lead ECG interpretation, fibrinolytics agents, hemodynamic monitoring, IABP's, rapid sequence intubation, chest tubes, and therapeutic medications and toxology for the critical care transport provider.
