This IBM® Redbooks® publication can help you develop content and process management applications with IBM FileNet® APIs. The IBM FileNet P8 suite of products contains a set of robust APIs that range from core platform APIs to supporting application APIs. This book focuses specifically on Content Engine and Process Engine APIs. Content Engine API topics that we discuss include creating, retrieving, updating, and deleting objects; querying and viewing documents; and batching and batch execution. We also explore more complex topics, including permissions and authorization, versioning, relationships, annotations, workflow subscriptions and event actions, metadata discovery, and dynamic security inheritance. Process Engine API topics that we discuss include launching a workflow, searching for and processing work items, and working with process status. The more complex topics we cover include, Component Integrator application space, role, workbooket, resource navigation in Process Engine REST API, ECM Widgets, and building a custom Get Next In-basket widget. To help you better understand programming with IBM FileNet APIs, we provide a sample application implemented for a fictional company. We include the data model, security model, workflows, and various applications developed for the sample. You can download them for your reference. This book is intended for IBM FileNet P8 application developers. We recommend using this book in conjunction with the online ECM help.

Noted for its practical, accessible approach to senior and graduate-level engineering mechanics, Plates and Shells: Theory and Analysis is a long-time bestselling text on the subjects of elasticity and stress analysis. Many new examples and applications are included to review and support key foundational concepts. Advanced methods are discussed and analyzed, accompanied by illustrations. Problems are carefully arranged from the basic to the more challenging level. Computer/numerical approaches (Finite Difference, Finite Element, MATLAB) are introduced, and MATLAB code for selected illustrative problems and a case study is included.

Trade, Travel, and Exploration: An Encyclopedia is a reference book that covers the peoples, places, technologies, and intellectual concepts that contributed to trade, travel and exploration during the Middle Ages, from the years A.D. 525 to 1492.

A History of Eastern Europe: Crisis and Change is a wide-ranging single volume history of the "lands between", the lands which have lain between Germany, Italy, and the Tsarist and Soviet empires. Bideleux and Jeffries examine the problems that have bedevilled this troubled region during its imperial past, the interwar period, under fascism, under communism, and since 1989. While mainly focusing on the modern era and on the effects of ethnic nationalism, fascism and communism, the book also offers original, striking and revisionist coverage of: * ancient and medieval times * the Hussite Revolution, the Renaissance, the Reformation and the Counter-Reformation * the legacies of Byzantium, the Ottoman Empire and the Hapsburg Empire * the rise and decline of the Polish-Lithuanian Commonwealth * the impact of the region's powerful Russian and Germanic neighbours * rival concepts of "Central" and "Eastern" Europe * the 1920s land reforms and the 1930s Depression. Providing a thematic historical survey and analysis of the formative processes of change which have played the paramount roles in shaping the development of the region, A History of Eastern Europe itself will play a paramount role in the studies of European historians.
