The Daihatsu Hijet is a microvan and pickup truck produced by the Japanese automaker Daihatsu. The first Hijet received a 360 cc two-stroke engine, as was dictated by the kei car laws of the time. The Hijet's development has long followed the evolution of Japan's kei regulations, with an increase to 550 cc in 1976 and then 660 cc for 1990.

Description 86,528 Kilometers Japanese VIN: S83P136243 The Daihatsu Hijet is a functional Mini Truck. Powered by a 660 cc 3 cylinder engine mated to a 4 speed manual transmission with High and Low gearing. The bed folds down to a full flat bed for very usable transportation. 100% legally imported from Japan and sold with a clean Virginia title.

A reference resource for entrepreneurs--anyone starting or operating a business.

Complete Suzuki DA16T Truck series parts and illustrations Service Manual with 518 Pages of illustrations and parts for the complete vehicle. R06A Engine, Transmission, 2WD, 4WD, Manual, Automatic, suspension, Brakes, Body, Interior, electrical, AC and more. Also, a complete list of all option parts you can add to your truck. A must have manual for repair or maintenance of the DA16T Series Truck

The utilitarian capabilities of a Japanese mini truck are remarkable, making it one of most versatile vehicles on the planet. Small enough in stature as to fit in the bed of an F150, but amazingly resilient, conquering mountainous terrain as a top-notch four-wheel drive should. As no English writing was found to exist, I thought it about time to write one, especially as Americans have been catching the buzz on mini trucks as the rest of world has been utilizing their attributes for decades. This guide through over 160 full-color images will bring to light as to what you've been missing: a mini truck truly will be a different experience than you can compare with any other vehicle in the automotive realm. Covered here are the history, uses, configuration, comparisons, specifications, makes, parts, accessories, and conversions (electric and amphibious). A book/guide you may start out reading alone, but as I've always discovered, the excitement this book lends through its photos and exposing mini trucks' odd capabilities: you will wind up sharing it with family and friends. Sincerely, Mark Roehrig I was amazed to find that English books on Kei trucks don't exist (Kei is Japanese for lightweight truck, pronounced "K"). That didn't seem right; after all, there's been over four million built and delivered to every corner of the world. So I thought it was about time that these magnificent, mighty mini trucks were put into words and photos for the English speaking and reading public. My hope is this illustrated guide will become your illustrated review as you can shelf it, and come back as needed, and it's the perfect show-and-tell for your family and friends who may have never heard of Kei trucks. What this book will do for you, after you've completed this guide, you'll be able to quote which states allow Kei trucks on public access roads, load and tow capabilities, the differences between a Acty and a Carry, or a Jumbo from a standard Hijet. You'll discover the possibilities that await you, commercial and private. You'll learn what to look for in a Kei truck and what to ask a prospective dealer; also included is what the DMV will want from you if you decide to register a Kei truck in one of the states allowing Kei trucks on the roadway.

Advanced Ceramics possess various unique properties and are able to withstand harsh environments. The aim of this book is to cover various aspects of the advanced ceramics like carbides, nitrides and oxides for energy and environment related applications. Advanced ceramics with additional functionality propose significant potential for greater impact in the field of energy and environmental technologies. This book focuses on the nanostructured ceramics synthesis, properties, structure-property relation and application in the area of energy and environment. It covers the high impact work from around 50 leading researchers throughout the world working in this field. This will help metallurgists, biologists, mechanical engineers, ceramicists, material scientists and researchers working in the nanotechnology field with inclusion of every aspect of advanced ceramics for energy and environmental applications.
