Vols. for 1967-70 include as a section: Who's who of Rhodesia, Mauritius, Central and East Africa.

"Web of Debt" unravels deceptions about the money system and presents a crystal-clear picture of the upcoming financial abyss. The text also explores a workable alternative, one that was tested in colonial America and is grounded in the best of American economic thought, including the writings of Benjamin Franklin, Thomas Jefferson, and Abraham Lincoln.

Everything from home mortgages to climate change has become financialized, as vast fortunes are generated by individuals who build nothing of lasting value. Das shows how "extreme money" has become ever more unreal; how "voodoo banking" continues to generate massive phony profits even now; and how a new generation of "Masters of the Universe" has come to dominate the world.

"Aftershocks was written in the midst of the deepest economic crisis since the Great Depression. Although it would be premature to presume to identify the repercussions of the crisis, it is clear that it will have profound aftershock effects in the political, economic, and social spheres. The book contains essays based on semi-structured interviews with leading scholars, European politicians and representatives from the world of business. They reflect on the origins of the crisis as well as the possible social, economic, and political transformations it may engender."--Publisher's description.

This book exposes important, often obscured truths about our money system and our economic past and future. Our money is not what we have been led to believe. The creation of money has been "privatized," or taken over by a private money cartel. It is all done by sleight of hand, concealed by economic double-speak. "Web of Debt" unravels the deception and presents a crystal clear picture of the financial abyss towards which we are heading, pointing out all the signposts. Then it explores a workable alternative, one that was tested in colonial America and is grounded in the best of American economic thought, including the writings of Benjamin Franklin, Thomas Jefferson and Abraham Lincoln. If you care about financial security, your own or the nation's, you should read this book. Ellen Brown has applied her training as a litigating attorney, researcher and writer to the monetary field, unearthing facts that even the majority of banking and financial experts ignore: ranging from the privatization of money creation, to the Plunge Protection Team, to the Federal Reserve's 'Helicopter Money. Read it; you'll get information you need in order to understand what is going on in our financial markets today. Bernard Lietaer, former European central banker, author of "The Future of Money" and "Of Human Wealth" .

Elizabeth DeLoughrey invokes the cyclical model of the continual movement and rhythm of the ocean ('tidalectics') to destabilize the national, ethnic, and even regional frameworks that have been the mainstays of literary study. The result is a privileging of alter/native epistemologies whereby island cultures are positioned where they should have been all along—at the forefront of the world historical process of transoceanic migration and landfall. The research, determination, and intellectual dexterity that infuse this nuanced and meticulous reading of Pacific and Caribbean literature invigorate and deepen our interest in and appreciation of island literature. —Vilsoni Hereniko, University of Hawai'i "Elizabeth DeLoughrey brings contemporary hybridity, diaspora, and globalization theory to bear on ideas of indigeneity to show the complexities of 'native' identities and rights and their grounded opposition as 'indigenous regionalism' to free-floating globalized cosmopolitanism. Her models are instructive for all postcolonial readers in an age of transnational migrations." —Paul Sharrad, University of Wollongong, Australia Routes and Roots is the first comparative study of Caribbean and Pacific Island literatures and the first work to bring indigenous and diaspora literary studies together in a sustained dialogue. Taking the "tidalectic" between land and sea as a dynamic starting point, Elizabeth DeLoughrey foregrounds geography and history in her exploration of how island writers inscribe the complex relation between routes and roots. The first section looks at the sea as history in literatures of the Atlantic middle passage and Pacific Island voyaging, theorizing the transoceanic imaginary. The second section turns to the land to examine indigenous epistemologies in nation-building literatures. Both sections are particularly attentive to the ways in which the metaphors of routes and roots are gendered, exploring how masculine travelers are naturalized through their voyages across feminized lands and seas. This methodology of charting transoceanic migration and landfall helps elucidate how theories and people travel, positioning island cultures in the world historical process. In fact, DeLoughrey demonstrates how these tropical island cultures helped constitute the very metropolises that deemed them peripheral to modernity. Fresh in its ideas, original in its approach, Routes and Roots engages broadly with history, anthropology, and feminist, postcolonial, Caribbean, and Pacific literary and cultural studies. It productively traverses diaspora and indigenous studies in a way that will facilitate broader discussion between these often segregated disciplines.
