'Decentralization, Democracy, and Development' contributes to the empirical literature on decentralization and the debate on whether it is a viable and desirable state-building strategy for post-conflict countries. Sierra Leone's progress in building local government capacity and restructuring the fiscal system is enviable. The authors conclude that improved security and public services are possible in a decentralizing country and Sierra Leone's progress would not have been possible without significant effort at fiscal decentralization and intensive investment in local government capacity building. The most critical ingredient for this promising but fragile reform process is the dynamic leadership team in charge of promoting the new institutional framework and their persistent effort to achieve quick improvement in the local government system and public services.

Decentralization reforms introduced to Africa in the 1990s have not always delivered the intended long-term outcomes. This is a collection on the consequences of these reforms two decades on. In addition to general and comparative overviews, the book contains case studies on Ghana, Senegal, Zimbabwe, Namibia, Ethiopia, and Uganda. The common theme across the chapters is that the reforms seem to have engendered political consequences beyond decentralization itself -

mostly through interaction with the broader historical, political, social, and economic context. The book thus speaks both to the scholarly literature (on decentralization, democratization, and development) and to the community of development practitioners. Most of the literature on decentralization and development emphasizes questions of institutional design and policy, but here the harder-to-pin-down political patterns marking the workings of decentralization are the main focus of analysis. The debates on development, through the case studies, are connected to the scholarly literatures on comparative federalism, comparative decentralization, and local democracy. The main conclusion that emerges from the studies in the book is that no magic formula that can turn countries into peaceful, stable, and prosperous democracies overnight exists. Furthermore, there are risks involved in importing formal institutions without regard to the local historical, political, social, and economic context. The chapters of this book were originally published as a special issue in *Regional and Federal Studies*.

In this definitive history, a key figure in the People's Campaign in Kerala provides a unique insider's account of one of the world's most extensive and successful experiments in decentralization. Launched in 1996, the campaign mobilized over 3 million of Kerala's 30 million people and resulted in bottom-up development planning in all 1,052 of its villages and urban neighborhoods. The authors tell a powerful story of mass mobilization and innovation as bureaucratic opposition was overcome, corruption and cynicism were rooted out, and parliamentary democracy prevailed. Considering both the theoretical and applied significance of the campaign in the context both of India's development since independence and of recent international debates about decentralization,
