The unsatisfying riposte to all these solutions may be that we simply have to wait for true network decentralization and wholesale democratic network governance. True decentralization often emerges from the roots of centralization, and in order to reach the next phase in decentralized networks, a period of centralization may be first necessary.

The paradox of civil service reform is that democratisation may be best achieved through the centralised structure which it will ultimately undermine. Proper ordering of the reform process will use the strong culture of centralised, hierarchical institutions to instill democratic training: democratisation should precede decentralisation.

Democracy and Governance | MSI

Democratic decentralization is the process of devolving the functions and resources of the state from the centre to the elected representatives at the lower levels so as to facilitate greater direct participation of citizens in governance. Devolution, envisioned by the Constitution, is not mere delegation.

Democratic Decentralisation in India - Drishti IAS

According to one definition: "Decentralization, or decentralizing governance, refers to the restructuring or reorganization of authority so that there is a system of co-responsibility between institutions of governance at the central, regional and local levels according to the principle of subsidiarity, thus increasing the overall quality and effectiveness of the system of governance while increasing the authority and capacities of sub-national levels."

This volume studies the relation of decentralization to democratization at both intermediate and local levels and analyzes how decentralization is transforming the relationship between the state and civil society.

The trend toward greater decentralization of governance activities, now accepted as commonplace in the West, has become a worldwide movement. This international development—largely a product of globalization and democratization—is clearly one of the key factors reshaping economic, political, and social conditions throughout the world. Rather than the top-down, centralized decisionmaking that characterized

communist economies and Third World dictatorships in the twentieth century, today's world demands flexibility, adaptability, and the autonomy to bring those qualities to bear. In this thought-provoking book, the first in a new series on Innovations in Governance, experts in government and public management trace the evolution and performance of decentralization concepts, from the transfer of authority within government to the sharing of power, authority, and responsibilities among broader governance institutions. This movement is not limited to national government—it also affects subnational governments, NGOs, private corporations, and even civil associations. The contributors assess the emerging concepts of decentralization (e.g., devolution, empowerment, capacity building, and democratic governance). They detail the factors driving the movement, including political changes such as the fall of the Iron Curtain and the ascendance of democracy; economic factors such as globalization and outsourcing; and technological advances (e.g. increased information technology and electronic commerce). Their analysis covers many different contexts and regions. For example, William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy, while Kadmeil Wekwete (United Nations) outlines the specific challenges to decentralizing governance in sub-Saharan Africa. In each case, contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result.

Successful reforms need coherent approaches in which a range of stakeholders are willing to share responsibilities and resources in order to achieve the ultimate outcome of poverty reduction in developing countries. This book provides a framework to access intended outcomes generated by decentralization measures implemented in Asian and African countries. It is based on comparative analyses of different experiences of decentralization measures in six developing countries.

This is a true state-of-the-art volume in the fields of local governance, decentralization, and local democracy. It summarizes many of the insights emerging from original research of the past decade. It is also a future-looking volume with explicit policy relevance, paving the way for innovative thinking, and acting, on the next phase of development in the field. In a unique way this book brings together authoritative contributions from authors who to a large extent have been defining the field for the last decade or more. It looks at how good governance is created from top-down and bottom-up perspectives, illustrated through a wide variety of case studies. The case studies were selected for their relevance to the theoretical perspectives offered, as well as for their paradigmatic power in the current global evolution of decentralized policies and politics. The volume concludes that overall, local development and local politics will not go away--it has a huge potential--but also that the field is full of unfulfilled promises, some of which could be remedied through the perspectives revealed in this volume.

Despite increasing interest in how involvement in local government can improve governance and lead to civic renewal, questions remain about participation's real impact. This book investigates participatory budgeting—a mainstay now of World Bank, UNDP, and USAID development programs—to ask whether its reforms truly make a difference in deepening democracy and empowering civil society. Looking closely at eight cities in Brazil, comparing those that carried out participatory budgeting reforms between 1997 and 2000 with those that did not, the authors examine whether and how institutional reforms take effect. *Bootstrapping Democracy* highlights the importance of local-level innovations and democratic advances, charting a middle path between those who theorize that globalization hollows out democracy and those who celebrate globalization as a means of fostering democratic values. Uncovering the state's role in creating an

"associational environment," it reveals the contradictory ways institutional reforms shape the democratic capabilities of civil society and how outcomes are conditioned by relations between the state and civil society.

Annotation Bridges the gap between theoretical literature and the tools and practices needed to strengthen or rebuild democratic institutions and reform governance systems. Through case studies and examples of good practices of governance, Cheema assesses the conditions that make democracy work.

This edited collection explores how African governments have sought to decentralize power in order to enhance democratic governance. It offers a range of insightful case studies and makes a case for the usefulness of decentralization as a method of sharing power at all levels of society in Africa.

The authors of this volume sift through the accumulating evidence to assess how well decentralization has fared. Focusing on consequences rather than causes, their goal is to inform future interventions in support of decentralized governance by showcasing some of the important trade-offs that it has generated so far.

Strengthening trust, accountability, and participation in government are essential to serving the needs of citizens. This volume brings together concepts and ideas from around the world on how to achieve more responsive and accountable public administration within the framework of democratic governance. Public officials and administrators are provided with conceptual and policy tools to help them understand today's complex challenges, and to pursue ideas that are most likely to enhance service delivery from the citizen's
