What is life like for workers in the gig economy? Is it a paradise of flexibility and individual freedom? Or is it a world of exploitation and conflict?
Callum Cant took a job with one of the most prominent platforms, Deliveroo, to find out. His vivid account of the reality is grim.
Workers are being tyrannised by algorithms and exploited for the profit of the few — but they are not taking it lying down. Cant reveals a transnational network of encrypted chats and informal groups which have given birth to a wave of strikes and protests. Far from being atomised individuals helpless in the face of massive tech companies, workers are tearing up the rulebook and taking back control.
New developments in the workplace are combining to produce an explosive subterranean class struggle — where the stakes are high, and the risks are higher.
Riding for Deliveroo is the first portrait of a new generation of working class militants. Its mixture of compelling first-hand testimony and engaging analysis is essential for anyone wishing to understand class struggle in platform capitalism.

The world of work has changed and so have trade unions with mergers, rebrandings and new unions being formed. The question is, how fitted are the unions to organise the unorganised?
With more than three quarters of UK workers unrepresented and the growth of precarious employment and the gig economy this topical new book by Bob Smale reports up-to-date research on union identities and what he terms 'niche unionism', whilst raising critical questions for the future.

'Honey & Co.'s food--taking its cue from generations of dedicated home cooks--captures everything that is generous, hearty, and delicious in the Middle East."--Yotam Ottolenghi
After falling in love through their shared passion for food, Itamar Srulovich and Sarit Packer launched Honey & Co., one of London's hottest new restaurants, in 2012. Since opening the doors, they have created exquisite dishes, delectable menus, and an atmosphere that's as warm, inviting, and exotic as the food they serve. Recipes include spreads and dips, exquisitely balanced salads, one-pan dishes, simple fragrant soups, rich Persian entrees, the tagines of North Africa, the Sofritos of Jerusalem, and the herb-infused stews of Iran. HONEY & CO. brings the flavors of the Middle East to life in a wholly accessible way, certain to entice and satisfy in equal measure.

Vivimos en una sociedad globalizada en la que los cambios se suceden de forma rápida y, en muchas ocasiones, impredecible. Por ello, el análisis reflexivo y realizado desde distintas disciplinas científicas nos aporta información muy valiosa para afrontar los retos y desafíos que la sociedad nos plantea y que la ciudadanía merece que intentemos solucionar. Este modelo de sociedad y la crisis que hemos padecido en los últimos años, ha provocado que la desigualdad y la precariedad social y económica estén patentadas en todo el mundo. En los países denominados desarrollados se están viviendo situaciones que creemos desterradas, la marginalidad y la injusticia social crecen, y es vital arbitrar soluciones para abordar estos problemas. Esta obra dividida en tres bloques aborda distintos problemas de gran relevancia y actualidad, relacionados con la economía, el empleo, género, acoso laboral y escolar, sexualidad y ecología, entre otros, desde una mirada global. Pero al mismo tiempo, se exponen estos problemas desde un punto de vista local, circunscritos a la comunidad de Castilla-La Mancha. Esta conjugación de lo global y lo local, en sintonía con el concepto de globalización y con la teoría de abordar la solución de problemas globales desde propuestas y actuaciones locales.

'Now you can make Siadatan's very good food at home'
The Times

Computer software and its structures, devices and processes are woven into our everyday life. Their significance is not just technical: the algorithms, programming languages, abstractions and metadata that millions of people rely on every day have far-reaching implications for the way we understand the underlying dynamics of contemporary societies. In this innovative new book, software studies theorist Matthew Fuller examines how the introduction and expansion of computational systems into areas ranging from urban planning and state surveillance to games and voting systems are transforming our understanding of politics, culture and aesthetics in the twenty-first century. Combining historical insight and a deep understanding of the technology powering modern software systems with a powerful critical perspective, this book opens up new ways of understanding the fundamental infrastructures of contemporary life, economies, entertainment and warfare. In so doing Fuller shows that everyone must learn how to be a geek, as the seemingly opaque processes and structures of modern computer and software technology have a significance that no-one can afford to ignore. This powerful and engaging book will be of interest to everyone interested in a critical understanding of the political and cultural ramifications of digital media and computing in the modern world.
