Features more than 30 all-new case studies showing best practices and world-class Updated to include more than 35 percent new material Offers a proven, universal five-phase process and methodology for creating and implementing effective brand identity

Financial accounting is the branch of accounting thought and practice concerned with preparing and providing information for external users of financial statements. This textbook helps students to understand the concepts that underpin the application of accounting theory to solve accounting problems. This international edition includes extracts from financial statements, definitions of key terms and exam examples. Unlike other textbooks, the author provides analysis of why accountants do what they do, and not just how. With such a wealth of accounting models and diagrams intertwined with this analysis, this book guides the reader through all the practicalities and concepts of financial accounting. Additional online questions, exercises and problems provide an opportunity to put this new-found knowledge into practice along the way. This book is an essential guide for students new to accountancy, and an equally useful tool for more experienced students and researchers.

Scott reveals vast amounts of financial accounting information drawn from recent research that has until now been hidden in academic journals. He provides a clear, easy-to-use framework for students to (1) place this information in a financial accounting context, (2) explain and analyze the information intuitively and (3) to reveal the information's relevance in understanding the practice of accounting.

People are using the future to search for better ways to achieve sustainability, inclusiveness, prosperity, well-being and peace. In addition, the way the future is understood and used is changing in almost all domains, from social science to daily life. This book presents the results of significant research undertaken by UNESCO with a number of partners to detect and define the theory and practice of anticipation around the world today. It uses the concept of ' Futures Literacy ' as a tool to define the

understanding of anticipatory systems and processes – also known as the Discipline of Anticipation. This innovative title explores:

- new topics such as Futures Literacy and the Discipline of Anticipation;
- the evidence collected from over 30 Futures Literacy Laboratories and presented in 14 full case studies;
- the need and opportunity for significant innovation in human decision-making systems.

This book will be of great interest to scholars, researchers, policy-makers and students, as well as activists working on sustainability issues and innovation, future studies and anticipation studies. The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351047999>, has been made available under a Attribution-NonCommercial-NoDerivs 3.0 IGO (CC-BY-NC-ND 3.0 IGO) license.

The importance of effective and well-planned presidential transitions has long been understood. The Presidential Transition Act of 1963 provided a formal recognition of this principle by providing the President-elect funding and other resources "To promote the orderly transfer of the executive power in connection with the expiration of the term of office of a President and the Inauguration of a new President." The Act received minor amendments in the following decades, but until 2010 all support provided was entirely post-election. The Pre-Election Presidential Act of 2010 changed this by providing pre-election support to nominees of both parties. Its passing reinforced the belief that early transition planning is prudent, not presumptuous. The Romney Readiness Project was the first transition effort to operate with this enhanced pre-election focus. While Obama's re-election prevented a Romney transition from occurring, it is hoped that the content of this book can provide a valuable insight to future transition teams of both parties.

This practical step-by-step guide provides everything you need not only to understand the standards, but to meet and exceed them.

This book constitutes the refereed proceedings of the 20th International Conference on Innovations for Community Services, I4CS 2020, held in Bhubaneswar, India, in January, 2020. The 16 revised full papers presented in this volume were carefully reviewed and selected from 46 submissions. The papers focus on all aspects of: communities and social networks; information and system security; cloud and network security; communication and networks; and data analytics and e-governance.
