Intensely private radio personality Art Bell, who lives in the middle of the desert 65 miles west of Las Vegas--where he broadcasts his radio shows--finally comes forward with his fascinating autobiography.

For those of us who are afraid we don't have what it takes to face our fears on our own, this story reminds us we have the skills and power to do so no matter how big and scary the problem, or monster, is. Most people think martial arts are for self-defense. While this is true, the art of Jiu-Jitsu also teaches us to have respect for ourselves and others. With this mutual respect, we can, through our actions, learn from one another. In this story, a child remembers how to use Jiu-Jitsu she knows to face her bedtime fear of monsters being under the bed. In so doing she remembers the real reason she learned this martial art, gains new friends through earning their respect, and teaches them the right way to go to sleep. Condition/Gift Wrap:

This book provides an accessible introduction to the SPARK programming language. Updated 'classic' that covers all of the new features of SPARK, including Object Oriented Programming. The only book on the market that covers this important and robust programming language. CD-ROM contains the main SPARK tools and additional manuals giving all the information needed to use SPARK in practice. Technology: The SPARK language is aimed at writing reliable software that combines simplicity and rigour within a practical framework. Because of this, many safety-critical, high integrity systems are developed using SPARK. User Level: Intermediate Audience: Software engineers, programmers, technical leaders, software managers. Engineering companies in fields such as avionics, railroads, medical instrumentation and automobiles. Academics giving MSc courses in Safety Critical Systems Engineering, System Safety Engineering, Software Engineering. Author Biography: John Barnes is a veteran of the computing industry. In 1977 he designed and implemented the RTL/2 programming language and was an original member of the ADA programming language design team. He was founder and MD of Alslys Ltd from 1985 to 1991. Currently self employed, John is the author of 'Programming in ADA' which has sold 150000 copies and been translated into 6 languages.

Junior Theory Level 1 - a foundational music theory book specifically designed for children aged 4-7.

Twenty years ago I set out to photograph children all around the world. My first trip was to the south of India. I started in the province of Tamil Nadu, first living in a Church Women Centre in the city of Chennai, then in Mugaiyur, a small village. For six months I took pictures and had conversations with roommates, guides, and members of the families who had taken me in as a guest. I had very many questions, as did they. After children, the main subject was always love. Everything I heard from them and saw around me there filled me with both surprise and doubt, but above all with admiration. I admired their courage and faith. Their arranged marriages were a fascinating mystery to me. One way to understand arranged marriages was to make portraits. I photographed women and men various ages, engaged or planned couples and married couples.

Please note that this edition is now out of print and has been replaced by the 8th edition, also available through MyiLibrary ... Written by two experts in tax and investment planning, IRAs presents the different types of retirement plans that are affected by distribution rules. It covers the tax options available to individuals when they either change employers or retire and have to take all of their money out of the employer's qualified plan. The book also examines IRAs and the new Roth IRAs: how to take distributions from them, designate beneficiaries and avoid even more potential penalties.
