#1 New York Times Bestseller At last, a book that shows you how to build a life you can thrive in, at any age or stage Designers create worlds and solve problems using design thinking. Look around your office or home—at the tablet or smartphone you may be holding or the chair you are sitting in. Everything in our lives was designed by someone. And every design starts with a problem that a designer or team of designers seeks to solve. In this book, Bill Burnett and Dave Evans show us how design thinking can help us create a life that is both meaningful and fulfilling, regardless of who or where we are, what we do or have done for a living, or how young or old we are. The same design thinking responsible for amazing technology, products, and spaces can be used to design and build your career and your life, a life of fulfillment and joy, constantly creative and productive, one that always holds the possibility of surprise. "Designing Your Life walks readers through the process of building a satisfying, meaningful life by approaching the challenge the way a designer would. Experimentation. Wayfinding. Prototyping. Constant iteration. You should read the book. Everyone else will." —Daniel Pink, bestselling author of Drive "This [is] the career book of the next decade and . . . the go-to book that is read as a rite of passage whenever someone is ready to create a life they love." —David Kelley, Founder of IDEO "An empowering book based on their popular class of the same name at Stanford University . . . Perhaps the book's most important lesson is that the only failure is settling for a life that makes one unhappy. With useful fact-finding exercises, an empathetic tone, and sensible advice, this book will easily earn a place among career-finding classics." —Publishers Weekly

Nearly eight hundred drawing enhance step-by-step instructions in every aspect and phase of planning and constructing one's own home

You've decided you're ready to build and enjoy the benefits of a tiny house, but how? Combining the "why" with the "how to," Building Your Tiny House Dream will show you each and every step to constructing your own custom camper. Part one provides detailed guidance on essential information, from the skills needed and planning to tools, safety, and helpful resources. Start building your personal tiny home in part two that's carefully laid out in order from start to finish, from laying the foundation, framing, and roofing to plumbing, adding personality, and towing so you can take your tiny home on wheels wherever you want to go! Also included is access to an online how-to video series of the author building the featured tiny home project from beginning to end. Written by award-winning tiny home builder Chris Schapdick, learn from an expert how to build the tiny house of your dreams!

A highly illustrated, practical handbook, showing the different methods of sustainable and eco-friendly construction.

I wrote this manual using a computer I built myself, let me show you how...Building your PC feels similar to a custom of passage. You have moved from purchasing off-the-shelf computers, which anybody can purchase to building your modified machine. It is so enjoyable and also daunting. However, the procedures itself is easy. We will guide you through all the things you should be aware of. I have simplified this manual to enable non-technical readers to see and understand the materials and steps that are used in building a computer. This guide has been made as simple as possible, so get it for yourself, your kids, and have fun while building a customized computer.

Explains basic architectural skills and tricks to help potential home owners create living environments that reflect their personal tastes and needs

Build your own sound, functional dock that will overcome almost any waterfront challenge with this essential guide. In Building your own Dock you'll find detailed plans, expert tips, advice on building methods, and insight on materials and specialty parts for all the most popular types of docks. Professional dock builder Sam Merriam explains the wide variety of modern docks, from traditional wood structures to modular, pre-built docks made with aluminum, plastic, or composites. Sam helps you design the best kind of dock for your application and waterfront environment as he explains their relative advantages, disadvantages, and customization options. Whether you decide to build your own dock, hire a builder, or purchase a ready-made, this book will reveal your choices, enhance your dock building knowledge, and empower you to create the dock you've always dreamed of.

A talented and skilled carpenter, builder and foreman, Keith has created a practical guide to project managing your own home building/renovations. It will start you off at the very beginning with advice on how to get started, and it will be filled with easy and achievable projects within the home and help to solve any home building/renovation dilemmas. Also included will be hints and tips on building, plumbing, painting, energy efficiency, cost saving and water conservation, as well as a list of top tips to consider when embarking upon a renovation, what to look out for, and who you need to appoint to help you achieve this. Keith appeals to all ages and has become a household name since appearing on The Block in 2011. He has the experience and qualifications to endorse his knowledge and skill within the building industry, and on The Block he is loved for being firm but fair.
