The past decade has been witness to a remarkable resurgence of interest in landscape. While this recovery invokes a return of past traditions and ideas, it also implies renewal, invention, and transformation. Recovering Landscape collects a number of essays that discuss why landscape is gaining increased attention today, and what new possibilities might emerge from this situation. Themes such as reclamation, urbanism, infrastructure, geometry, representation, and temporality are explored in discussions drawn from recent developments not only in the United States but also in the Netherlands, France, India, and Southeast Asia. The contributors to this collection, all leading figures in the field of landscape architecture, include Alan Balfour, Denis Cosgrove, Georges Descombes, Christophe Girot, Steen Hoyer, David Leatherbarrow, Bart Lootsma, Sebastien Marot, Anuradha Mathur, Marc Treib, and Alex Wall.

Groundswell: Constructing the Contemporary Landscape looks at twenty-three remarkable examples of designed open spaces - found throughout the United States, Europe, Asia, and the Middle East - that portray the surge of creative activity in contemporary landscape design. The projects range from innovative reinterpretations of the traditional town square to large parks, often built on ground reclaimed from obsolescence or degradation as cities remake and redefine their outdoor spaces.

Combine traditional techniques with modern media for more communicative renderings Digital Drawing for Landscape Architecture: Contemporary Techniques and Tools for Digital Representation in Site Design, Second Edition bridges the gap between traditional analog and new digital tools by applying timeless concepts of representation to enhance design work in digital media. The book explores specific techniques for creating landscape designs, including digitally rendered plans, perspectives, and diagrams, and the updated second edition offers expanded coverage of newer concepts and techniques. Readers will gain insight into the roles of different drawings, with a clear emphasis on

presenting a solid understanding of how diagram, plan, section, elevation, and perspective work together to present a comprehensive design approach. Digital rendering is faster, more efficient, and more flexible than traditional rendering techniques, but the design principles and elements involved are still grounded in hand-rendering techniques. Digital Drawing for Landscape Architecture exploits both modalities to help designers create more beautiful, accurate, and communicative drawings in a professional studio environment. This second edition contains revised information on plan rendering techniques, camera matching workflow, and color selection, along with brand new features, like: Time-based imagery and tools Workflow integration techniques Photoshop and Illustrator task automation Over 400 updated images, plus over 50 new examples of award-winning work The book takes a tutorial-based approach to digital rendering, allowing readers to start practicing immediately and get up to speed quickly. Communication is a vital, but often overlooked component of the design process, and designers rely upon their drawings to translate concepts from idea to plan. Digital Drawing for Landscape Architecture provides the guidance landscape designers need to create their most communicative renderings yet.

This book showcases new trends in the vital and changing field of landscape design. Important contemporary concerns affecting the landscape professional are considered: the impact of recent scientific research, historic preservation, populations with unique needs, international practices, and much more.

Detail in Contemporary Residential Architecture provides analysis of both the technical and the aesthetic importance of details in the development of contemporary residential architecture.
