Authors argue, for example, that the body functions as a schema of logical thought; that through the body we have access to an intricacy more ordered than language and logic; that we benefit morally and socially by attention to the cognitive function of emotions; and that we cannot maintain the dignity of the world nor extend value without aesthetic engagement. Both traditional philosophy and contemporary developments come into play in the essays.

Whether landscapes, portraits, architecture, still-life or action shots, each photo's set-up diagram shows the location and where the lights, reflectors and other equipment were placed to take the finished picture. Comparative photographs show how changes of angle, lighting or composition will give dramatically different results.
