The internal ATSC tuner will receive and deliver live over-the-air TV programming to devices that do not contain a TV tuner.

On February 17, 2009, analog television broadcasting in the United States will end. As of that date, all television stations will switch to digital TV broadcasts -- effectively making obsolete every analog television set in the country. What do you need to do to keep watching television after the switch to digital? Do you need to buy a new television set? If so, what kind of set? Do you need a fancy high definition TV? Or is there a way to make your old TV still work with the new digital broadcasts? Should you switch to cable or satellite television? And what is digital television, anyway? These are just a few of the questions people are asking as the switch to digital TV approaches. All of these questions and more are answered in this short book. Don't be one of the tens of millions of people who are confused about the switch to digital TV and may lose their broadcast signal on February 17! Buy this book and take the guesswork out of the switch to digital TV! What you can learn in this book - o What is the difference is between Digital TV and HDTV o How to switch your analog antenna reception to digital o What you need to do if you are a cable, DSL or satellite subscriber o How to connect a digital converter box o Tips on shopping for a new digital TV o Great solutions to your digital TV problems

Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in all facets of the Entertainment and Media Business, from broadcasters to film production companies, casino operators to theme park companies, publishers of books and magazines to video game designers, and much more. Our corporate profiles include executive contacts, growth plans, financial records, address, phone, fax and much more. This innovative book offers unique information, all indexed and cross-indexed more for each firm! Our industry analysis section provides an exceptional discussion of business and market trends. The book includes statistical tables covering revenues for several industry sectors. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key data.

The author explores the various industry initiatives and standard bodies that are defining open set-top box technologies, describes the operating systems and middleware products available, and looks at the servers and technologies that are needed to support broadband Internet, intranet and TV-centric applications.

The results of the educational television conference held by the Internationales Zentralinstitut fA1/4r das Jugend-und Bildungsfemsehen are presented in this book. These essays evaluate the uses and acceptance of educational television based on an examination of educational programs produced by European television stations that audiences thought ""interesting"" or ""instructive."" Analysis focuses on types of viewers and users, differences in learning styles, images of educational programs, and viewers expectations of television as a medium for education and learning.
