Image-Making-India explores the evolving meaning of images in a digital landscape from the vantage point of contemporary India. Building upon long-term ethnographic research among image-makers in Delhi, Mumbai and other Indian cities, the author interrogates the dialogue between visual culture, technology and changing notions of political participation. The book explores selected artistic experiences in documentary and fiction film, photography, contemporary art and digital curation that have in common a desire to engage with images as tools for social intervention. These experiences reveal images' capacity not only to narrate and represent but also to perform, do and affect. Particular attention is devoted to the 'digital', a critical landscape that offers an opportunity to re-examine the significance of images and visual culture in a rapidly changing India. This volume will be of particular interest to scholars of visual and digital anthropology and cultures as well as South Asian studies.

Digital Photography and Everyday Life: Empirical studies on material visual practices explores the role that digital photography plays within everyday life. With contributors from ten different countries and backgrounds in a range of academic disciplines - including anthropology, media studies and visual culture - this collection takes a uniquely broad perspective on photography by situating the image-making process in wider discussions on the materiality and visuality of photographic practices and explores these through empirical case studies. By focusing on material visual practices, the book presents a comprehensive overview of some of the main challenges digital photography is bringing to everyday life. It explores how the digitization of photography has a wide-reaching impact on the use of the medium, as well as on the kinds of images that can be produced and the ways in which camera technology is developed. The exploration goes beyond mere images to think about cameras, mediations and technologies as key elements in the development of visual digital cultures. Digital Photography and Everyday Life will be of great interest to students and scholars of Photography, Contemporary Art, Visual Culture and Media Studies, as well as those studying Communication, Cultural Anthropology, and Science and Technology Studies.
