A comprehensive curriculum designed specifically for teaching two- and three-year-olds.

"Digital photography opens up a whole new world of communication within early childhood settings, giving scope for devising more effective ways of engaging children, producing resources and encouraging interaction with parents. Kim Walters shares her journey of discovery in 'Capture the moment: Using digital photography in early childhood settings'. Kim outlines how implementing her ideas has led to positive outcomes for children and parents, through the use of such materials as: digital portfolios; storybooks featuring photos of children in the group (a powerful tool for emergent literacy); games, puzzles and charts created with input from children; resources which encourage independence; resources to enhance communication with families." -back cover.

Urban educational research, practice and policy is preoccupied with problems, brokenness, stigma and blame. As a result, too many people are unable to recognize the capacities and desires of children and youth growing up in working-class and immigrant communities. Based on an original longitudinal study and offering a critical visual methodology of "collaborative seeing", this book shows how a racially, ethnically and linguistically diverse community of young people in Worcester, MA used cameras at different ages (10, 12, 16, 18) to capture the centrality of care in their lives, homes and classrooms. This truly unique book enables children to be the authors of their own narratives and issue an explicit challenge to the dominant deficit and damage-based ways of seeing working-class childhoods.

The Creative Curriculum comes alive! This videotape-winner of the 1989 Silver Apple Award at the National Educational Film and Video Festival-demonstrates how teachers set the stage for learning by creating a dynamic well-organized environment. It shows children involved in seven of the interest areas in the The Creative Curriculum and explains how they learn in each area. Everyone conducts in-service training workshops for staff and parents or who teaches early childhood education courses will find the video an indispensable tool for explaining appropriate practice.

INCLUSIVE EARLY CHILDHOOD EDUCATION: DEVELOPMENT, RESOURCES, AND PRACTICE, Sixth Edition, is a comprehensive special education resource book that provides essential information on a variety of early childhood learning disabilities, as well as strategies for including children with these special needs in regular educational settings. The author provides students with a solid grounding in theory and research, as well as practical guidelines, real-world vignettes, and hands-on program planning assistance to prepare them to integrate children with learning disabilities into their classrooms. Updated throughout, this edition also introduces videos that are available for viewing at the Early Childhood Education Media Library, allowing students to see text concepts brought to life in real classroom settings. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Prompt students to become the sophisticated readers, writers, and thinkers they need to be to achieve higher learning. The authors explore the important relationship between text, learner, and learning. With an array of methods and assignments to establish critical literacy in a discussion-based and reflective classroom, you will encourage students to find meaning and cultivate thinking from even the most challenging expository texts.

Presents key terms in a working theoretical model that can be used in understanding the role of information inquiry in instruction and includes practical applications.

I am an optometrist. I owned a very traditional medical, white coat practice in Pittsburgh, Pennsylvania near the University of Pittsburgh for 10 years. I became bored and uninspired in this vanilla business environment and sterile space. Feeling restless, I sold my practice and began the search for a new place to start a fresh concept in optometry. I found Frederick, Maryland, which is a historic, walkable little city that tops the triangle with DC and Baltimore. I relocated to a new town, in a new state with a brand new practice - Unique Optique. I was an outsider and a transplant, trying to win Frederick's trust and convince the residents of this town to come to my practice to spend money on high-end glasses. To accomplish this feat, I decided that I needed to show our authenticity, exude genuine sincerity, and smile through adversity. I embraced my flaws; I was vulnerable and real. I used social media, in-house events and the decor of the office to display the business's personality. People instantly related to the practice. They saw that I was not perfect, but I was earnest and that I truly cared. I was proud of my venture. Unique Optique's reviews were stellar and real. The practice grew steadily and by the end of the first year, I was recognized as the Start Up Entrepreneur of Frederick County. Soon, I had requests from business owners and entrepreneurs to come and visit the practice and discuss our unique image strategies. People wanted this quality for their own businesses. I realized that I had helpful and valuable information and put my techniques down on paper. While developing my brand and marketing my business, I have made mistakes, learned from them, and attempted to fix them. I have worked through adversity and difficulties. In the end, I cultivated a brand to which people could relate. This is my experience. I hope it helps you find your Unique Technique."
