Jupiterimages/Comstock/Getty Images. The Dodge 360 cubic inch displacement V8 engine was introduced in 1970, and has been used in many car and light truck applications. Ignition timing is set according to the firing of the number one spark plug, that is the plug that fires first in the ignition firing order. The number one spark plug is set to fire a certain number of degrees before the number one cylinder reaches the exact top of its stroke, referred to as "before top dead center" (BTDC).

Put a fuseholder in this wire as close as possible to your power takeoff point. You'll want a 15A fuse, and you'll want to carry spares. #85 is your trigger ground. Run a 16ga wire from this one to any decent ground. #86 is your trigger feed. This one needs a 16ga wire that's live when (and only when) the ignition is switched on.
