The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

"A must-read . . . Takes you inside a child's gut and shows you how to give kids the best immune start early in life." —William Sears, MD, coauthor of The Baby Book Like the culture-

changing Last Child in the Woods, here is the first parenting book to apply the latest cutting-edge scientific research about the human microbiome to the way we raise our children. In the two hundred years since we discovered that microbes cause infectious diseases, we've battled to keep them at bay. But a recent explosion of scientific knowledge has led to undeniable evidence that early exposure to these organisms is beneficial to a child's well-being. Our modern lifestyle, with its emphasis on hyper-cleanliness, is taking a toll on children's lifelong health. In this engaging and important book, microbiologists Brett Finlay and Marie-Claire Arrieta explain how the trillions of microbes that live in and on our bodies influence childhood development; why an imbalance of those microbes can lead to obesity, diabetes, and asthma, among other chronic conditions; and what parents can do--from conception on--to positively affect their own behaviors and those of their children. They describe how natural childbirth, breastfeeding, and solid foods influence children's microbiota. They also offer practical advice on matters such as whether to sterilize food implements for babies, the use of antibiotics, the safety of vaccines, and why having pets is a good idea. Forward-thinking and revelatory, *Let Them Eat Dirt* is an essential book in helping us to nurture stronger, more resilient, happy, and healthy kids.

Powerfully posing questions of ethics, ideology, authorship and form, documentary film has never been more popular than it is today. Edited by one of the leading British authorities in the field, *The Documentary Film Book* is an essential guide to current thinking on documentary film. In a series of fascinating essays, key international experts discuss the theory of documentary, outline current understandings of its history (from pre-Flaherty to the post-Griersonian world of digital 'i-Docs'), survey documentary production (from Africa to Europe, and from the Americas to Asia), consider documentaries by marginalised minority communities, and assess its contribution to other disciplines and arts. Brought together here in one volume, these scholars offer compelling evidence as to why, over the last few decades, documentary has come to the centre of screen studies.

A key collection of essays that looks at the specific issues related to the documentary form. Questions addressed include 'What is documentary?' and 'How fictional is nonfiction?'

Demonstrates how documentary work is a narrative constructed by the observer and meant not only to represent reality but to interpret it, and provokes consideration of how fine a line exists between fact and perception

Producing a documentary is a process that has many steps, most of which must be done in a certain order. Fail to take one of these steps and your production may trip over legal, business, or artistic obstacles. This workbook is custom-designed to guide students at The Film School @ Northwest Nazarene University through the process of documentary production from idea to final release. But it can also be used by anyone who'd like to be sure they don't miss one of those critical steps. In professional work we wouldn't necessarily fill out paperwork and formally discuss every step in this workbook for every project. But even if you're shooting a quick and simple conference or pageant, you'll need to at least think about - consider - almost every one of these steps. It's what we call workflow. And this isn't even the end of the story. Large crews working on large documentaries - such as those created by Ken Burns - will have dozens more forms, processes, and procedures to follow. This workbook - and its companion Single Camera and Multicamera versions - comprises what we feel are the essential steps in producing a doc. Welcome to documentaries, and to The Film School @ NNU. You're about to tell a story you may not fully understand until it's finished!

The perfect St. Patrick's Day gift, and a book in the best tradition of popular history -- the untold story of Ireland's role in maintaining Western culture while the Dark Ages settled on Europe. Every year millions of Americans celebrate St. Patrick's Day, but they may not be aware of how great an influence St. Patrick was on the subsequent history of civilization. Not only did he bring Christianity to Ireland, he instilled a sense of literacy and learning that would create the conditions that allowed Ireland to become "the isle of saints and scholars" -- and thus preserve Western culture while Europe was being overrun by barbarians. In this entertaining and compelling narrative, Thomas Cahill tells the story of how Europe evolved from the classical age of Rome to the medieval era. Without Ireland, the transition could not have taken place. Not only did Irish monks and scribes maintain the very record of Western civilization -- copying manuscripts of Greek and Latin writers, both pagan and Christian, while libraries and learning on the continent were forever lost -- they brought their uniquely Irish world-view to the task. As Cahill delightfully illustrates, so much of the liveliness we associate with medieval culture has its roots in Ireland. When the seeds of culture were replanted on the European continent, it was from Ireland that they were germinated. In the tradition of Barbara Tuchman's *A Distant Mirror*, *How The Irish Saved Civilization* reconstructs an era that few know about but which is central to understanding our past and our cultural heritage. But it conveys its knowledge with a winking wit that aptly captures the sensibility of the unsung Irish who relaunched civilization. **BONUS MATERIAL:** This ebook edition includes an excerpt from Thomas Cahill's *Heretics and Heroes*.

Michael Rabiger guides the reader through the stages required to conceive, edit and produce a documentary. He also provides advice on the law, ethics and authorship as well as career possibilities and finding work.

The story of the creation of the Book of Mormon has been told many times, and often ridiculed. *A Documentary History of the Book of Mormon* presents and examines the primary sources surrounding the origin of the foundational text of the Church of Jesus Christ of Latter-day Saints, the most successful new religion of modern times. The scores of documents transcribed and annotated in this book include family histories, journal entries, letters, affidavits, reminiscences, interviews, newspaper articles, and book extracts, as well as revelations dictated in the name of God. From these texts emerges the captivating story of what happened (and what was believed or rumored to have happened) between September 1823--when the seventeen-year-old farm boy Joseph Smith announced that an angel of God had directed him to an ancient book inscribed on gold plates--and March 1830, when the Book of Mormon was first published. By compiling for the first time a substantial collection of both first- and secondhand accounts relevant to the inception of the divine revelation--or clever fraud--that launched a new world religion, *A Documentary History* makes a significant contribution to the rapidly growing field of Mormon Studies.
