preprogrammed models that combine  
moderation with serial mediation or  
parallel and serial mediation. \*Appendix  
B, describing how to create customized  
models in PROCESS v3 or edit  
preprogrammed models.

This volume introduces the statistical,

Read Online Doing  
Statistical Mediation And  
Methodological, and conceptual aspects of  
mediation analysis. Applications from  
health, social, and developmental  
psychology, sociology, communication,  
exercise science, and epidemiology are  
emphasized throughout. Single-mediator,  
multilevel, and longitudinal models are  
reviewed. The author's goal is to help the

Read Online Doing  
Statistical Mediation And  
Moderation apply mediation analysis to their  
own data and understand its limitations.  
Each chapter features an overview,  
numerous worked examples, a summary,  
and exercises (with answers to the odd  
numbered questions). The accompanying  
CD contains outputs described in the book  
from SAS, SPSS, LISREL, EQS, MPLUS,

Read Online Doing  
Statistical Mediation And  
and CALIS, and a program to simulate the  
model. The notation used is consistent  
with existing literature on mediation in  
psychology. The book opens with a review  
of the types of research questions the  
mediation model addresses. Part II  
describes the estimation of mediation  
effects including assumptions, statistical

Read Online Doing  
Statistical Mediation And  
Moderation Methodology In  
tests, and the construction of confidence  
limits. Advanced models including  
mediation in path analysis, longitudinal  
models, multilevel data, categorical  
variables, and mediation in the context of  
moderation are then described. The book  
closes with a discussion of the limits of  
mediation analysis, additional approaches

Read Online Doing
