John Melchior Bosco (Italian: Giovanni Melchiorre Bosco; 16 August 1815 – 31 January 1888), popularly known as Don Bosco [ˈdɔ̃m ˈbɔ̃sko], was an Italian Roman Catholic priest, educator, and writer of the 19th century. While working in Turin, where the population suffered many of

the ill-effects of industrialization and urbanization, he dedicated his life to the betterment and education of ...

My Lost Childhood is a memoir describing immeasurable suffering the author went through in his early childhood. In the late 1980s, the Islamic government began to systematically torture and kill Southern Sudanese families, burn their villages, and enslave young boys and girls. As a result, an approximately, as numbers are largely unknown and only an estimate, 27,000 plus boys from Southern tribes were forced to flee from their homes. Traveling naked and barefoot, they sought refuge in neighboring Fugnido, Ethiopia, where a few years later they were forced to flee yet another civil war. Returning to Sudan, the Islamic government forced them to travel for another five months, ultimately arriving in Kakuma, Kenya, after four years of unthinkable hardship and walking over thousands of miles naked, barefoot, and ailing from starvation, dehydration, and diseases. Many boys perished along the way and their numbers shrank into few thousands. Abraham Deng Ater, separated from his family in 1987, is one of approximately 3,800 boys now known as the Lost Boys of Sudan. He left Kakuma Refugee Camp in Kenya after several years of massive suffering and was granted refuge in the U.S. in 2001. Many Lost Boys including Abraham have since become U.S. citizens and have continued to pursue their education. Thousands more have also been granted refuge elsewhere and are scattered around the globe.

The UNCOMMON MAN, shares the author's life in the Philippines, for his wife, children and grandchildren to cherish. The book is written in the format of an Autobiography. The contents are based purely on memories and recollections of the author and any discrepancies or variations from actual facts are purely incidental and not intentional."

Skills development in Ghana encompasses foundational skills, transferable/soft-skills, and technical and vocational skills. This report focuses on one segment of this skills development system: formal and informal technical and vocational education and training (TVET) at the pre-tertiary level. TVET represents a major intersection between education, youth and the labor market. The government has long promised to the population that increasing technical and vocational skills training opportunities will help solve youth unemployment. However, market distortions and inefficiencies have led to an adverse cycle of high costs, inadequate quality of supply and low demand, leading to further pressures on the effectiveness and efficiency of TVET services. This adverse cycle means that the political and policy promise of skills development helping to ease the unemployment problem is at risk of remaining unfulfilled. The report focuses on social and economic demand for (pre-tertiary) technical and vocational skills and maps out the supply of these skills from formal and informal, private and public sectors. The dual purpose has been to both carry out an institutional and policy analysis and also to establish a platform for monitoring sector performance and assisting policy and Development Partner harmonization. The report analyzes the economic and social demand for technical and vocational skills and the suitability of the current supply as well as the effectiveness of policy, coordination and financing of technical and vocational skills development. The report annex provides the summary of economic demand analyses from the key sectors reviewed and provides a full mapping of all technical and vocational programs in Ghana. The study offers a

comprehensive set of policy recommendations for improving Ghana's pre-tertiary technical and vocational skills development sector, which will be of interest to policy makers and development partners in Ghana.

Hispanic Engineer & Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans.

This book is the first that provides a comprehensive overview of the way countries, education systems and institutions have responded to the call for an integration of learning for work, citizenship and sustainability at the Second International Conference on Technical and Vocational Education which was held in Seoul in 1999. Discussions on the central theme of the Seoul Conference - lifelong learning and training for all, a bridge to the future - led to the conclusion that a new paradigm of both development and Technical and Vocational Education (TVET) was needed. This book showcases the wide range of international initiatives that have sought to put such exhortations into practice. It includes: case studies of national TVET policy reforms, reoriented curricula, sustainable campus management programs, and examples of innovative approaches to integrating learning in TVET with on-the-job training and in community service. It also focuses on the issues and challenges being faced and ways of moving forward. Case studies feature initiatives in a wide range of world regions and countries, and include authors from: UK, Germany, Finland, Canada, USA, Australia, South Africa, China, Republic of Korea, India, Pakistan and the Philippines.
