An elevated yet accessible follow-up to Lauren Liess's Habitat, showcasing her signature easy-living lifestyle Down to Earth picks up right where Lauren Liess's critically acclaimed Habitat left off. While Habitat walked readers through the decorating process step-by-step, Liess's latest title takes a step beyond the basics and invites readers to incorporate the main components of her familiar design aesthetic: nature, easy living, and approachability. With evocative photos and substantive design advice, Down to Earth focuses on creating a lifestyle that inspires creativity and functionality. Throughout the book, Liess shows readers how to incorporate six guiding principles in six unique homes: a new farmhouse, a classic American historical home, a lakeside contemporary house, a modern villa, a turn- of-the-century American Foursquare, and a cedar and glass house on a bluff. While each home has a different architectural style, fingerprints of Liess's down-to-earth style are evident throughout.

Ten-year-old aspiring geologist Henry Bower investigates the meteorite that crash lands in the hayfield, discovering a rock that will change his family, his town, and even himself.

The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.

In this ambitious and provocative text, environmental historian Ted Steinberg offers a sweeping history of our nation—a history that, for the first time, places the environment at the very center of our story. Written with exceptional clarity, Down to Earth re-envisions the story of America “from the ground up.” It reveals how focusing on plants, animals, climate, and other ecological factors can radically change the way that we think about the past. Examining such familiar topics as colonization, the industrial revolution, slavery, the Civil War, and the emergence of modern-day consumer culture, Steinberg recounts how the natural world influenced the course of human history. From the colonists' attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good, the author reminds readers that many critical episodes in our history were, in fact, environmental events. He highlights the ways in which we have attempted to reshape and control nature, from Thomas Jefferson's surveying plan, which divided the national landscape into a grid, to the transformation of animals, crops, and even water into commodities. The text is ideal for courses in environmental history, environmental studies, urban studies, economic history, and American history. Passionately argued and thought-provoking, Down to Earth retells our nation's history with nature in the foreground—a perspective that will challenge our view of everything from Jamestown to Disney World.

Down to Earth presents the first comprehensive overview of the geopolitical maneuvers, financial investments, technological innovations, and ideological struggles that take place behind the scenes of the satellite industry. Satellite projects that have not received extensive coverage/microsatellites in China, WorldSpace in South Africa, SiriusXM, the failures of USA 193 and Cosmos 954, and Iridium/are explored. This collection takes readers on a voyage through a truly global industry, from the sites where satellites are launched to the corporate clean rooms where they are designed, and along the orbits and paths that satellites traverse. Combining a practical introduction to the mechanics of the satellite industry, a history of how its practices and technologies have evolved, and a sophisticated theoretical analysis of satellite cultures, Down to Earth opens up a new space for global media studies.

Kids all over the world help collect seeds, weed gardens, milk goats and herd ducks. From a balcony garden with pots of lettuce to a farm with hundreds of cows, kids can pitch in to bring the best and freshest products to their families' tables/and to market. Loaded with accessible information about the many facets of farming, Down to Earth takes a close look at everything from what an egg carton tells you to why genetic diversity matters/even to kids.

'I was pulled into simple living before I knew what it was. It crept up on me using the smallest of steps and didn't reveal its true beauty and real power until I was totally hooked. I was searching for a way to live well while spending very little money. What I found was a way of life that also gave me independence, opportunity and freedom.' Rhonda Hetzel gently encourages readers to find the pleasure and meaning in a simpler life, sharing all the practical information she has gathered on her own journey. Whether you want to learn how to grow tomatoes, bake bread, make your own soap and preserve fruit, or just be inspired to slow down and live more sustainably, Down to Earth will be your guide.

The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.

There's hardly anyone in the world more down-to-earth than Jesus. That sounds far-fetched because, well, Jesus is God. But read the Gospels and you find Jesus telling stories that ring true from beginning to end, stories you can immediately identify with, stories that make you go "hmmn." In Down to Earth we learn that these stories are different from the stories we tell each other--these are stories intended to change your life. They're soul stories--stories that get inside you and linger there, stories you start to find yourself living into. And when you do, you and the world around you are transformed for good.

Written as he talks, this is Monty Don right beside you in the garden, challenging norms and sharing advice. Discover Monty's thoughts and garden ideas around nature, seasons, color, design, pests, flowering shrubs, containers, and much more. Read about the month-by-month jobs he does in his own garden that he hopes are relevant to you. Monty's intimate and lyrical writing is accompanied by photos of his garden, showing areas rarely seen on television. This is the perfect gift for the gardener in your life. "I have written many gardening books but this is the distillation of 50 years of gardening experience. It has all the tips and essential pieces of knowledge that enable you to make your garden grow well, and it also shares my view that gardening is the secret to living well too." - Monty
